

How to measure your panel system for a custom PlexiGuard™ Fitting

1. If available: Brand and Model of Panel system:
 - a. Brand:
 - b. Model:
2. Take photos of your panel system from several different angles. Please include the photos with the completed version of this form.

We recommend additional shots farther back and from different angles. (See Samples Below)

3. Top Cap Width Measurement

Insert Top Cap
Width
Measurement:

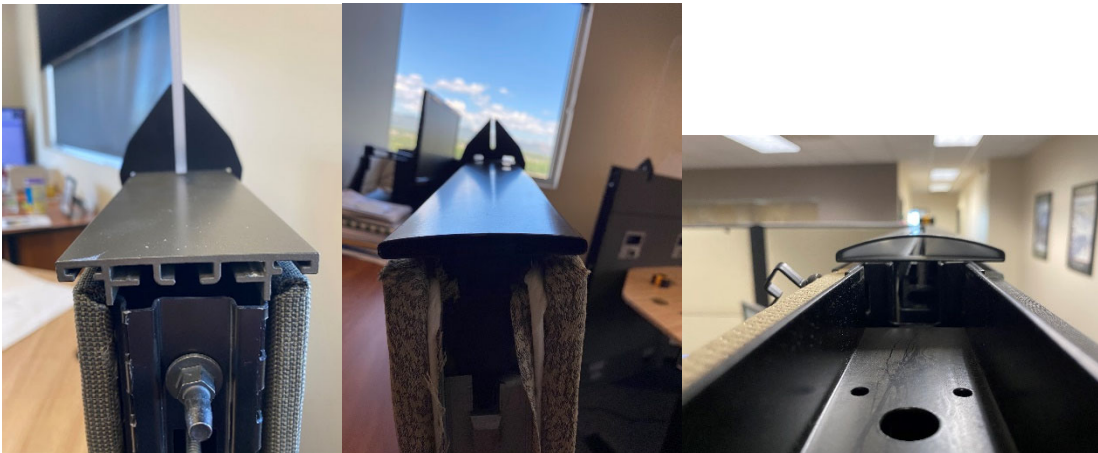

4. Main Panel Width Measurement

(The left image has a consistent width, the right two have different thicknesses. We need both)

**Insert Main
Panel Width
Measurement:**

5. What is the shape of the top cap? Flat top or curved?

**Please List
Top Cap
Shape:**

6. How thick are the sides of the top cap?

**Insert Top Cap
Side Thickness
Measurement:**

After completing this form, please email it (with good quality photos) to the address below. We'll see if we have a good match in stock, or we can fabricate new ones for you to test on your panel system.
