Completion Date	10/15/2020

Biamp Products:

(3) IV6 1122WR05, (3) IV6 1122WR15, (6) IV6 1122WR15 (6) ALC1604D,
(2) ALC3202D

Why We Won:

The Moreno Valley Civic Center Amphitheater targets a seven-acre green space adjacent to the City Hall and Conference Recreation Center. The new 500-600 seat theater is anticipated to host 75-100 events a year and will serve as the city's premier performance venue. The new amphitheater will provide seats in an open-air venue with an architectural style that responds to the adjacent civic center. The outdoor audio system was designed by MCH (McKay Conant Hoover, Inc.) out of Scottsdale, AZ and awarded to Audio Associates out of San Diego. MCH chose Community Loudspeakers based on Community's price/performance value and the outstanding quality and performance in outdoor applications. The system features a combination of IV6 and IP8 weatherize speakers and ALC amplification utilizing the on-board ArmoniaPlus DSP.
