Most comprehensive TPA RMIS feature set available in the bundled market

Strongest bundled RMIS economic value proposition in the industry

NPS of 9.7

FIND OUT HOW LUMINOS GIVES YOU THE EDGE OVER YOUR COMPETITORS.

Historically, robust RMIS products that were needed to meet current global risk management challenges were not available in the bundled TPA marketplace.

Through our partnership with Origami Risk, Gallagher Bassett (GB) has created an industry-leading 'hybrid' RMIS solution. Alongside core Origami software features, we draw from our repository of TCOR-management intellectual capital, providing our own add-on suite of dynamic benchmarks, scorecards, and AI-driven predictive analytics. Our best-in-class RMIS approach delivers the actionable information you need to drive superior claims outcomes.

Offering pre-configured data inquiry and analytics RMIS capabilities, we also support application customizations and an array of add-on Expanded Services features:

- OSHA module
- Policy management
- Enterprise Risk Management (ERM)
- Life safety audits
- Incident management
- Data integration

Our state-of-the-industry implementation, training, and client support programs ensure our LUMINOS RMIS tools are ready to go on your TPA program inception date.

The 2021 RMIS Report awarded LUMINOS with the highest feature-set ranking in the bundled TPA space and, for the fourth year in a row, GB clients have rewarded LUMINOS with the top NPS® scores for a bundled RMIS solution.

Find out how LUMINOS can help you achieve meaningful change and superior outcomes by connecting with us today.
