

COTA® WIRELESS POWER FOR TABLE CHARGING

Eliminate consumer's mobile battery level anxiety with the Cota Power Table

Wireless Power Makes Charging Away from Home Easier

Travel, hospitality, and dining industries are well poised to provide a new convenience to consumers who gather together in common rooms: an outlet-free charging table.

Guests can stay untethered to wires and plugs while continuous, uninterrupted energy charges their devices wirelessly. Benefits include:

- Cord-free charging
- Decreased number of outlets needed, no fighting for plugs
- Freedom to reposition tables for cleaning or events
- Power as a service option: consumers can secure a place at the table

The Cota Power Table is a solution to the “power panic” problem at airports, coffee shops, convention centers, restaurants, and hotels.

Cota Wireless Power:

A 5-time CES Innovation Award Winner in 2016, 2017, 2018, 2019, and 2022!

COTA WIRELESS POWER RECEIVER & TRANSMITTER
CE AND UKCA APPROVED, FCC APPROVED UNDER PARTS 15 & 18

License Cota Technology

The Cota Power Table is available for purchase through Ossia directly or as a technology license for manufacturers. Cota Real Wireless Power is FCC certified for commercial, industrial, and business uses in the US. Partners in the EU, UK, AU, and NZ may also license Cota without distance limitations for consumer applications.

Transform the hospitality experience with Cota.

Deliver power over distance, in motion, without line of sight.

Drive Traffic and Sales with Cota Power Table

Providing convenient charging services to a wide range of consumers is proven to drive traffic and sales by increasing visit time and spend. The Cota Power Table:

- Leverages widely used Qi standard with cutting edge Cota technology to charge the 200+ Qi-enabled devices at market, including Apple, Samsung, and LG smartphones
- Allows for data on customer turn times
- Allows management of power delivery to encourage turns as needed
- Enables contact-free charging to decrease outlet wear and tear

COTA IS:

- Wireless power without cables, plugs, or charging mats
- Power delivered safely over air at a distance
- A two-way communication tool that can be managed and secured over the cloud

Cota Power Table is ready to be integrated into your coffee shops, airports, restaurants, hotels, and more.

How the Cota Power Table Works

- A transmitter disguised as a ceiling tile, which covers a 10m area, continuously powers the table's receiver
- The receiver, which includes Cota-enabled Qi coils by NuCurrent, are hidden within a durable glass-looking table top, delivers power wirelessly to Qi-enabled consumer devices resting on the top
- The table is available in multiple heights and finishes
- On board power storage device includes overcharge protection circuit and power gauge

Streamline the Charging Workflow Experience

Delivering wireless power over air within the Power Station not only makes the charging routine much easier for your employees and vendors, but you also don't need to rely on wires, outlets, and charging cables for each and every device. Cota Power Station simplifies charging.
