

Top News WITH IMAGES

MT Newswires' popular Top News service comes with the option of high-resolution images to greatly enhance the news experience on any platform. An in-house team of veteran financial reporters cultivates and produces the Top News feed to include the most significant news and events driving global capital markets and economies each and every business day.

An ideal complement to any of MT Newswires' premium Live Briefs news services, Top News with Images is available as a global service or can be entitled by individual region (North America, Europe, or Asia) to provide a relevant and engaging news display for your clients.

Top News Service Levels:

- **Global Markets**

This global newsfeed provides around the clock coverage of the top stories driving capital markets, business and economies across North America, Europe and Asia.

- **Europe**

This region-specific feed provides an in-depth look at the most significant drivers of European capital markets and economies.

- **North America**

Covering the US and Canada, this regional feed provides timely, intra-day coverage of the most important geopolitical, economic and capital market news for the investment community.

- **Asia**

This region-specific feed gives readers insight into the critical events and topics affecting Asian capital markets and economies.

*Top News with (or without) Images can be delivered to your application via XML feed directly or from any one of our [distribution partners](#).
