Guest Paging Communication

Streamline the guest experience

When guests are free to roam, they can enjoy a beverage at the bar or browse your gift shop. Treat your patrons to a drink and a distraction and they'll forget they were even waiting when you alert them that their table is ready."

Maintain guest loyalty and increase sales. Whether you're in the restaurant, retail or hospitality industry, you understand the importance of guest satisfaction.

Make the dining-out or shopping experience more pleasant and efficient. With GuestCall® guest pagers, your guest feels more connected while they visit the bar or shop while they wait.

Our guest pagers are designed to streamline your guest's experience. Choose between 3 guest pager models to fit your needs. Scale your guest paging system as your business grows.

Staff & Server Communications

Front-of-House and Back-of-House Unite

When your team is linked, your business thrives. With a server paging system for your restaurant, the front-of-house and back-of-house are harmoniously connected. Quickly alert waitstaff, hostesses, managers, kitchen staff, cooks and more.

Whether you need to quickly address maintenance, food or guest status, staff paging systems streamline the workflow in your bar or restaurant.

Save on labor and maximize staff and server productivity. With a staff paging system, you can do more with less and everyone's job becomes easier, more efficient and less stressful.

Bring your team together.

Connect your team with quick, efficient communication

Unite your team for optimum guest satisfaction and productivity. Use staff and server pagers to run your business efficiently and make your services shine.

P/N TXSC1CXL

Call Buttons

Send instant messages to staff or team members

Instantly contact staff with our long range, reliable wireless call buttons. Our push button transmitters are ideal for quick, high volume, one-way communication.

We understand how critical your communication needs are. That's why we take our push button transmitters seriously. Offering the best range and coverage in the industry, we use 12 FCC Shared License Frequencies for "Hassle Free" legal operation with no interference.

Our push button paging systems are great for medical offices, individual and multi-provider practices including restaurants, clinics, dental care, eye care, retail, grocery stores, manufacturing facilities, church and school classrooms, stadiums, arenas and more.

Guest Location

Guest Location made easy

EasyVu™ Guest Locator

Enable servers and staff to accurately locate guests and provide services quicker — leading to higher profit margins.

Precise table location technology is helping restaurants provide services and food delivery faster. Happy customers are return customers and that is especially true for the hospitality industry. With the fast-casual dining trend on the rise, restaurants are competing for speed and convenience.

In healthcare, EasyVu provides operational benefits by enabling staff a reliable way to locate, track and page visitors and family members throughout the facility.

Vuze® Guest Location

With Vuze guest tracking, you can easily customize the system to improve guest experience and gain valuable insight on traffic.

The Vuze® Table Location System from JTECH is a seamless RFID table tracker ideal for restaurants
