Full Stack Net Developer - Charlotte, NC

About the Company

At Forest2Market, we believe high-quality market information improves business performance, and we are dedicated to providing that quality on a consistent basis. With transactional data, industry experience and third-party independence, Forest2Market provides participants in the global wood products, paper and bioenergy/biochemical supply chains with business solutions that support fact-based decision making and planning.

Forest2Market has experienced significant growth since establishing its roots in the Southeastern US in 2000. We now offer solutions to forest products industries throughout North America, Brazil, Scandinavia, the Baltic States and western Russia, and we are actively expanding into Chile, Uruguay and the Australasian markets.

Over the last 12 months, Forest2Market has also vertically integrated to build a group of companies that offer data-based business solutions across complementary manufacturing sectors. Fisher International offers data, analytics and business intelligence capabilities to global pulp and paper industries, and Tecnon OrbiChem offers data and analytics to the petrochemical industry focusing primarily on chemical intermediates, synthetic fibers, and resins.

Scope of Position

The successful candidate for this position will be part of a team that is responsible for reviewing, augmenting, and improving code written by external offshore developers in C# using the .NET framework, which is the basis of multiple customer and internal user facing, full stack web and client / server applications. This position will report to the Director of Information Technology, will participate in IT support coverage, and may assist in other IT related projects and activities as dictated by the needs of the business.

Major Responsibilities

- Review, augment, and improve the code for multiple full stack web and client / server applications written using C# and the .NET framework
- Assist in other IT related projects and activities as dictated by the needs of the business
- Participation in IT support coverage for the business

Skills & Abilities

- Proven development experience in a data intensive environment
- Experience designing and implementing high performance, scalable solutions
- Experience with efficient database design
- Experience writing high performance queries, stored procedures, and functions
- Experience designing high performance dashboards using a variety of charting and mapping technologies
- Strong attention to detail
- Desire to learn new concepts and technologies
- Experience with Python, HighCharts, Leaflet, SAS, ArcGIS, and the forestry / wood products, or chemical industry is a plus

Required Experience

- Full stack web and client / server application development using C#, .NET Framework, & MVC
- Web UI development using standard technologies like HTML, CSS, Bootstrap, JavaScript, jQuery, and Ajax
- Database design and development using database systems like Microsoft SQL and PostgreSQL
- Web-based charting and mapping tools like HighCharts and Leaflet

Education

- A degree in Computer Science or similar field
- 2+ years of relevant work experience in addition to a degree
- 5+ years of proven development experience may be accepted in lieu of a degree

Compensation and Benefits

- Compensation is commensurate with experience
- Benefits package provided
