INTUITIVE SOFTWARE

SignMaster Craft Software

The RCP-3301 13" Craft Mini Vinyl Cutter comes with the easy-to-use SignMaster Craft Software. This software has hundreds of tools that can be used to create and edit images for cutting. With the SignMaster Software, you can easily turn images into cuttable designs the machine can read.

SOFTWARE FEATURES

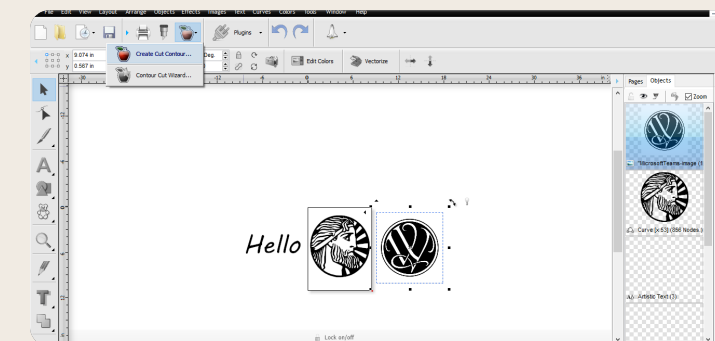

The SignMaster Craft software has hundreds of powerful tools and features that helps you easily create custom designs right on your computer.

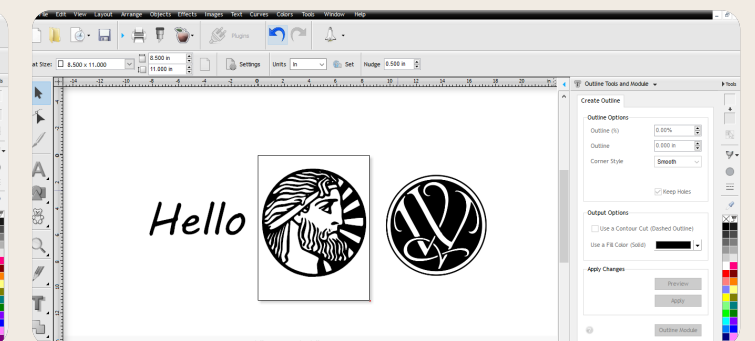

Import/Export

Upload custom artwork and images in formats like tif, jpg, png, pdf and more. You can then export your design in any format you need to open in other programs.

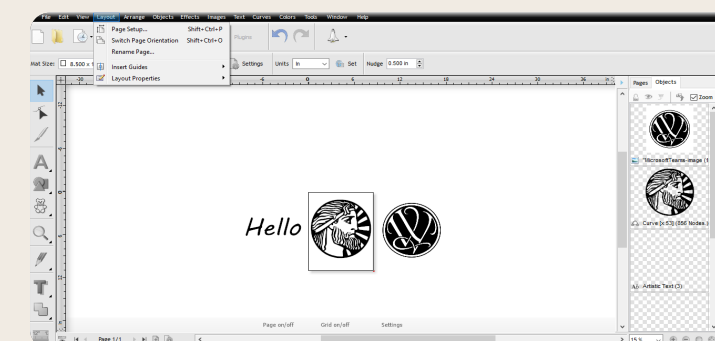

Contour Cut

Use this special SignMaster Craft feature to quickly and accurately cut around the edges of a printed design.

Design Tools

This software has basic design tools that allow you to create and adjust shapes, text, curves and much more.

Layout Tools

Layout the designs exactly where they need to be by adjusting the scale, size, rotation and more.

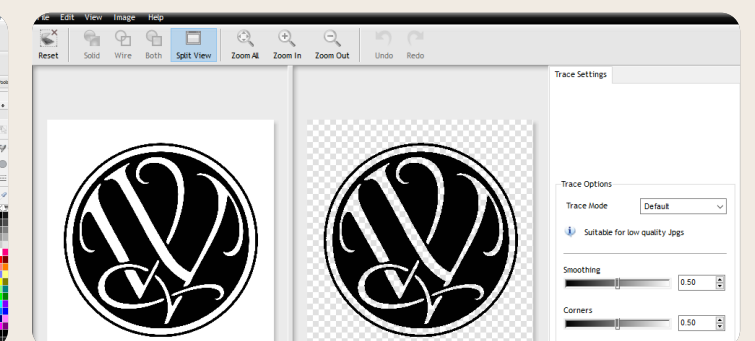

Image Vectorization

Easily convert images into vector art that can then be cut by the machine.

STABLE CUTTING

The RCP-3301 has all the high-quality tools necessary to cut perfect designs every time. From its precise contour cutting technology to the strong pinch rollers that provide stability for vinyl rolls and sheets, this machine is made to consistently create clean designs.

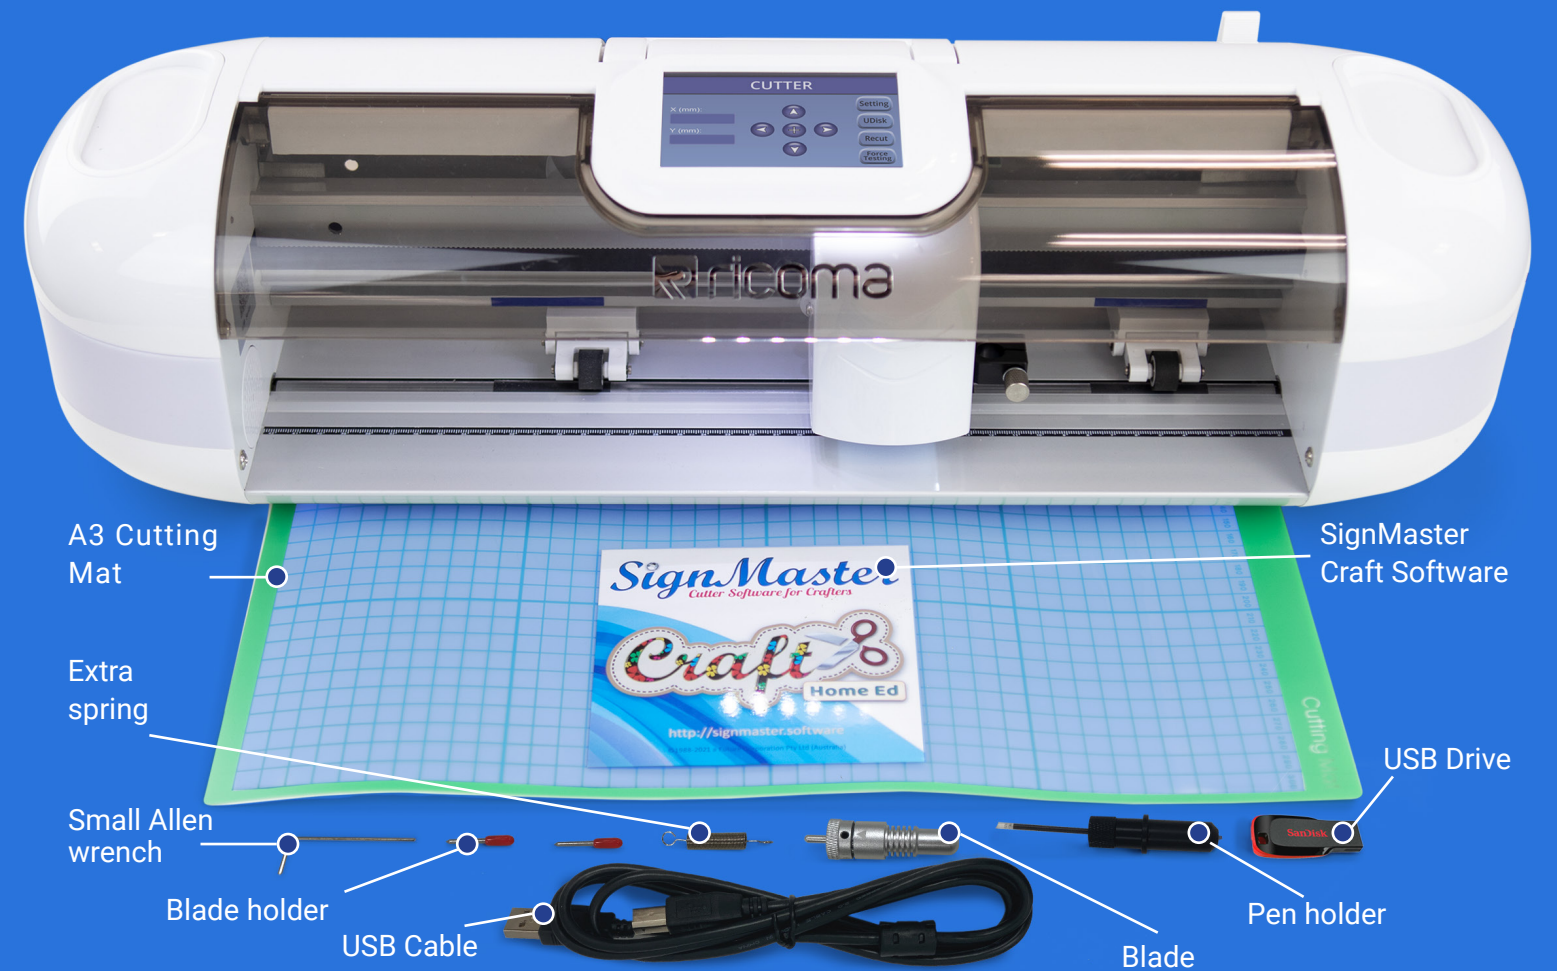

ADJUSTABLE TOOLS

To ensure you have complete control over the vinyl cutting process, the RCP-3301 13" Craft Mini Vinyl Cutter allows you to adjust your cutting force and speed. You can change the machine's settings based on the type of material you are cutting and easily test the cutting force at the touch of a button. With these adjustable tools, you can be sure you'll have the exact settings needed for every job.

WHAT'S INCLUDED

Make cutting and plotting your projects easier than ever with the helpful tools included with the RCP-3301 craft mini vinyl cutter packages.

PRO PACKAGE INCLUDES A HEAT PRESS!
