LARGE FIRES:	Use foam.
- Unsuitable extinguishing media: Do not use water as an extinguishing media.
- Flash Point and method: 275° F (135° C) PMCC
- Explosive limits in air:
 

Upper:	Not available
Lower:	Not available
- Auto-ignition temperature: Not available.
- Sensitivity to mechanical impact/static discharge: Not available.
- Special Protective Equipment: Wear self-contained breathing apparatus and full protective clothing.
- Other Fire Fighting Considerations: Cool containers with flooding quantities of water until well after fire is out.
- Exposure hazards: Thermal decomposition or burning may produce carbon monoxide and / or carbon dioxide.

#### 6. ACCIDENTAL RELEASE MEASURES

- Personal Precautions: An appropriate NIOSH/MSHA approved respirator should be used if a mist, vapor or dust is generated. Wear suitable gloves and eye/face protection. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing.
- Environmental Precautions: Minimize contamination of drains, surface and ground waters.
- Procedures for Spill/Leak Clean-up: Neutralization not required. Contain spill. Absorb or cover with dry earth, sand or other non-combustible material and transfer to containers for disposal. Dispose as any grease or oily material in compliance with Federal, State, and/or Local

requirements.

## 7. HANDLING AND STORAGE

- Handling: Handle in accordance with good hygiene and safety procedures. Avoid contact with eyes, skin, and clothing. Prevent formation of dust. Wash thoroughly after handling. Since empty containers contain product residue and can be dangerous, follow all hazard warnings and precautions even after container is emptied. Keep away from sources of ignition.
- Storage: Keep away from possible contact with incompatible substances. Store in acid resistant vessels such as stainless steel, aluminum, or steel coated with resin lining such as Lithcote LC-19 or Kanigen. Do not store near sources of ignition.

## 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

- General Precautions: Good industrial hygiene should be followed. Avoid breathing (heated) vapors. Avoid eye and skin contact.
- Exposure Limit Values: Not established
- Exposure Controls:
  - Engineering Controls: Ventilation: Local exhaust: preferred  
Mechanical: may be necessary if working at elevated temperatures or in enclosed areas.
  - Personal Protective Equipment: Eye: Goggles or face shield with goggles, dependent upon potential exposure.  
Skin: Protective gloves: Rubber or plastic  
Dependent upon degree of potential exposure, additional personal protective equipment may be required, such as chemical boots and full protective clothing.  
Inhalation: None required for ambient temperature, although an appropriate NIOSH/MSHA approved air-purifying respirator should be used if a mist, vapor or dust is generated. A NIOSH/MSHA approved self-contained breathing apparatus or air-supplied respirator is recommended if the concentration exceeds the capacity of cartridge respirator. WARNING: Air purifying respirators do not protect workers in oxygen-deficient atmospheres.
  - Other Controls: Boots, eye wash fountain, safety shower, apron, protective clothing.
- Environmental Exposure Controls: Contact Twin Rivers Technologies for specific Community

information.

**Eye Irritation (Rabbits)**

Undiluted Hexanoic/Octanoic Acid with no rinsing of the eyes produced severe ocular damage whereas rinsing the eyes with water after instillation of the test material reduced involvement to mild to moderate but transient irritation.

**Eye Irritation (Monkeys)**

Undiluted Hexanoic/Octanoic Acid, with no rinsing of the eyes with water after instillation, produced superficial corneal effects and rather severe congestion of the conjunctiva. All eyes were normal within nine days after instillation of the test material.

**Skin Irritation (Four-Hour Test)\***

	Primary Irritation Index	Degree of Irritancy
Rabbits	4.5	Moderate
Guinea Pigs	0.5	Slight
