

Gel Mate® Silicone Gel Sheets

Gel Mate® medical grade silicone gel sheet is a first-choice for treatment of post-op and post-injury scar management.

Softly adherent gel is backed with an anti-bacterial nylon fabric that keeps the sheeting in place and eliminates catching on clothing or bandages.

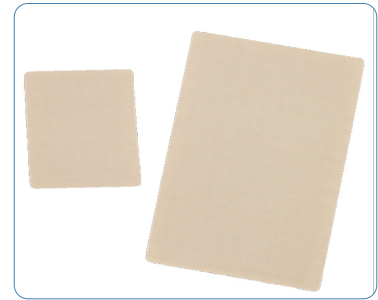

Features and Benefits

Only 2 mm thick, Gel Mate provides excellent adherence for compression and occlusion to heal old or new scars.

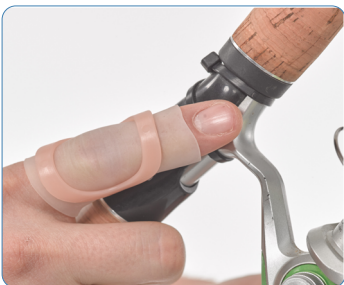

Grid backing makes it easy to cut Gel Mate to size and can be used to document healing and reduction in scar size.

4" x 6" pkg of 1 or 5 sheets

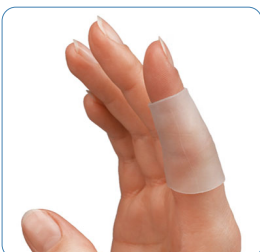

2 1/2" x 3" pkg of 2 sheets

Gel Tubes

Medical grade mineral oil enriched Gel Tubes ease pressure and friction on fingers and toes and are ideal under finger orthoses to improve wearing compliance.

Protect and cushion finger lacerations, ulcerations, enlarged joints, corns, hammertoes and more.

One size fits most. Gel Tubes are 1/2" wide (1.5 cm) and 1 5/8" long (4 cm).
Sold in packages of 5.
