

# INDIANAPOLIS TRUCKING COMPANY PROTECTS GROWTH AND PROPERTY IN HIGH-CRIME AREA WITH THE ELECTRIC GUARD DOG™ FENCE.

## THE PROBLEM

Quality Companies wanted to expand operations. However, Quality Companies was/is situated in one of the highest-risk areas for theft in the city.

The primary target for theft—truck batteries, up to 100 at a time. The cost of each battery ranges between \$150 and \$180.

Quality's headquarters consists of five truck yards that stores 2,000 trucks and assets valued between 700 and 800 million dollars. Fences, access controls, and security guards could never deter theft and vandalism at Quality Companies.

## THE SOLUTION

The Electric Guard Dog fence was the only viable solution. The Electric Guard Dog fence stands just inside an existing chain-link perimeter and delivers a safe-yet-memorable 7,000-volt shock when touched. Lights and alarms also activate during an attempted breach.

Clear and visible multilingual signs placed every 30 feet warn criminals of the potential shock. The Electric Guard Dog fence protects an expanded perimeter more efficiently at lower cost, while enabling Quality Companies' personnel to focus on building security and completing other essential tasks.

## THE RESULTS

Since installation of The Electric Guard Dog fence, Quality Companies has experienced zero losses. The site is more secure and more profitable, having eliminated the cost of contract security guards. The property is now an oasis in the midst of a high-crime area, and criminals move on when they encounter The Electric Guard Dog fence. In fact, The Electric Guard Dog fence protects all of Quality's Indianapolis locations as well as its Dallas facility.

## THE BENEFITS

Employee peace of mind is measurably improved since installation. So is productivity, morale, and safety. Management is also impressed with the ongoing customer service from AMAROK. Quality Companies considers The Electric Guard Dog fence as "safe and effective."

**"Any request I've made has been followed through. Our local tech is just fantastic. He checks everything from top to bottom, gets us hooked up and worked out. I couldn't be any more pleased."**

— JIM HOUSE, *Head of Corporate Security and Facilities Manager, Quality Companies of Indianapolis, Indiana*
