Portable Electric Fencing

AMAROK Portable Electric Fencing secures your goods inside a custom-sized 360-degree temporary perimeter or extends existing electric fence lines across an expanded area.

- Alarm panel, keypad, and siren are included to permit controlled access
- Powered by batteries and charged by solar panels
- Securely mounted in a job box for quick, easy installation
- Configured to site specifications (starting at 200 linear feet for six-month duration)
- Secured with stakes, or sandbags, depending on the terrain
- Installation, takedown, service, repair, and alarm monitoring included
- Optional security cameras and video monitoring available

Affordable monthly fee.
Includes service and maintenance.

Portable Fence Specifications

Dual-layered, free-standing fence panels are 12 feet wide and include 6-foot-high chain-link fence and 8-foot-high electric fence wires.

Safe isolation of electric wires from the chain-link fence – only the electric fence wires are energized.

Fence panels are interconnected to provide a secure perimeter.

Common Applications

Construction sites for site-wide security or creation of secure equipment storage zones.

Protection of seasonal inventory or overflow lots.

Temporarily extends the boundaries of The Electric Guard Dog™ Fence line.
