# Vegetation Control

## Strengthen Perimeter Security

Vegetation overgrowth drops fence voltage and provides cover for thieves. **Vegetation Control** ensures peak system performance and the highest levels of perimeter security.

### AMAROK Offers Three Vegetation Control Options:

**Option One:**

Overgrowth Removal + Ongoing Maintenance—New Installation

- Remove overgrowth in a three-foot area where The Electric Guard Dog™ Fence will stand
- After installation, regular maintenance keeps fence clear of overgrowth

**Option Two:**

Overgrowth Removal + Ongoing Maintenance—Current Customer

- Clear existing overgrowth on and around the existing Electric Guard Dog Fence to ensure peak performance
- Perform same regular maintenance as Option One

**Option Three:**

Ongoing Maintenance—Current Customer

Let AMAROK assume the responsibility of regular and ongoing maintenance to keep The Electric Guard Dog Fence at full voltage and efficiency, so you can focus on managing your business.

*Vegetation maintenance is not solely associated with fence performance. Pricing varies based on perimeter footage and the amount of foliage present. Does not include removal of vehicles, debris, ornamental landscaping, or other like items.*
