

SERVICE KING PRIORITIZES CUSTOMER SERVICE WITH AMAROK'S SECURITY SOLUTIONS

**SERVICE KING****OKLAHOMA CITY,
OKLAHOMA****AUTO BODY****REACTIVE**

#AutoBody #Reactive
#Persistence #ElectricFencing

THE SITUATION

Service King, an auto body shop, was experiencing frequent break-ins and theft in their customers' vehicles. This was tarnishing their reputation, as customers believed their vehicles were not safe on their property. Service King initially declined our security solutions, but the crime persisted.

THE RESULTS

As a result of the persistent crime, Service King finally signed with AMAROK. Service King invested in The Electric Guard Dog™ Fence, as well as lay down fencing in order to protect their customers' vehicles.

THE BENEFITS

This installation has been able to give Service King peace of mind, knowing that their shop is safe from theft. They have also been able to reinforce their relationship with their customers, by going the extra step to make sure their vehicles are protected. AMAROK has been able to show Service King Corporate that we truly are the best fitting security solution for them. Service King's General Manager was so impressed by our security solution that he signed a service agreement for his own private business to be AMAROK secured.
