

FLEET TRACKING SERVICE

VIDEO: THE FUTURE OF FLEET MANAGEMENT

What if you could see how your field professionals are representing your brand in the field—without ever leaving your desk? Now you can. Our Fleet Tracking Service combines the power of video with leading-edge GPS tracking for a real-time view* of your fleet, so you can better manage your field resources at every turn.

- ✔ Make smarter decisions to improve response times, productivity, and customer service
- ✔ Industry-leading video and fleet tracking in one integrated solution
- ✔ Built on over 20 years of innovation in fleet technology, safety, and efficiency

DRIVEN BY LYTX DRIVECAM® EVENT RECORDERS

It's more intelligent than a dashcam. Powered by built-in machine vision and artificial intelligence [MV+AI], these state-of-the-art devices help distinguish normal driving from risky behaviors to capture risk on the road when paired with our Risk Detection Service or Driver Safety Program.

FLEET MANAGEMENT MADE EASY

Efficiently operate your fleet with data at your fingertips, on your desktop, tablet, or smartphone.

- Mobile-friendly interface with color-coded view settings
- Insights to help manage fuel usage (with OBD-II or J1939 ECM connection)
- Mileage data extracts by state

SEE WHAT'S HAPPENING IN AN INSTANT

With the Fleet Tracking Service, you can quickly monitor your assets in the field and access video when you need it most—anywhere you're connected.

REAL-TIME FLEET STATUS WITH VIDEO ALWAYS ON HAND

Keep technicians on schedule, improve time to service, and stay aware of unauthorized activity with timely information, such as vehicle location, closest vehicle to a destination, and more. Plus view up to 100 driving hours of continual video for a more complete picture of fleet performance.

- Live vehicle status and trip histories with route replay
- Alerts to geofencing, speeding, and idling violations
- Seamlessly link to all features of the Lytx Video Platform

DOES WHAT YOU NEED, WORKS WITH WHAT YOU HAVE

Check in on your vehicles with a powerful combination of GPS tracking and video telematics—designed for the technology you already know and use.

- Data is captured by Lytx DriveCam Event Recorders with no need for additional equipment
- See real-time vehicle location powered by Google Maps and Google Traffic
- Automate data for third-party systems, such as dispatch and service management with Lytx APIs

ACHIEVE EFFICIENCY THROUGH FUEL MANAGEMENT

Know your most inefficient drivers by checking driving habits, such as braking, idling, and speeding that may cause excessive fuel consumption and vehicle wear and tear.

- Use highly accurate information from the vehicle's engine control module (with OBD-II or J1939 ECM Connection)
- Automates the labor-intensive task of accurately collecting odometer mileage readings so you always have correct information

HOW DOES THIS SOLUTION HELP ME?

RESPOND FASTER

Make the most of existing assets to deliver prompt customer service. Access up-to-the-minute details to minimize phone time, reduce callbacks, and complete more jobs per day.

WORK MORE EFFICIENTLY

Know where vehicles are and when you can expect them to arrive. This way, you can make the right decisions for the most efficient routes, fuel economy, and use of resources.

GET THE BEST FROM YOUR FLEET

Supervise in real time to optimize productivity, verify service delivery, enforce company policies, and prevent unauthorized vehicle use.

MANAGE OPERATIONS WITHOUT THE GUESSWORK, THANKS TO REAL-TIME FLEET STATUS AND THE POWER OF VIDEO
