

BRADBURY

DW VIPER®

THE BRADBURY CO., INC.

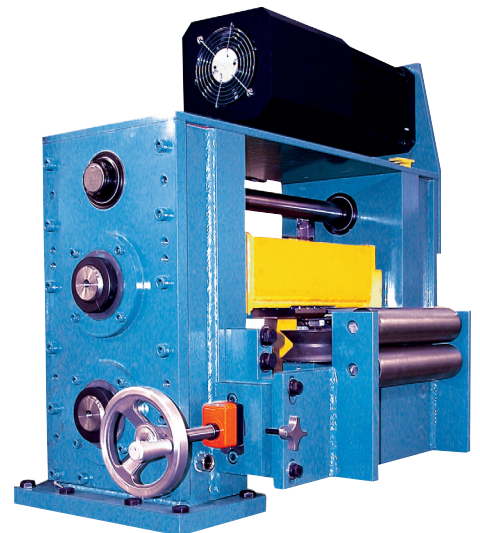

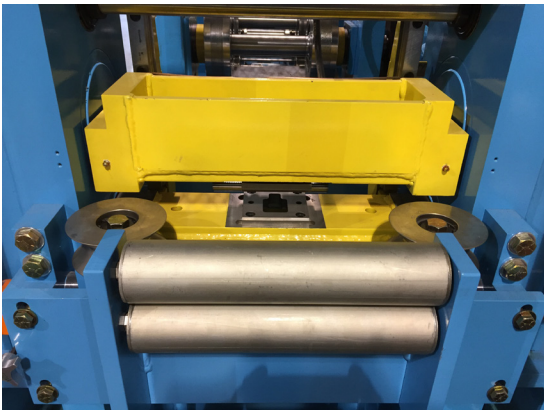

PRODUCE DRY WALL AND OTHER LIGHT METAL FRAMING COMPONENTS FAST AND ECONOMICALLY

The compact DW VIPER® uses patented Proprietary Vertical Approach technology and high-speed rotary mechanics. The DW VIPER'S standard linear punch tooling is economical and easy to maintain. High-efficiency coil-handling and stacking systems are available to complete the productivity package. the DW VIPER is built by the leaders in the steel framing industry, so you can count on outstanding performance, engineering support, unsurpassed part quality, and on-site service.

EASY TO RETROFIT. EASY TO RUN.

- » DW VIPER package includes companion decoiler & cutoff to combine punching, rollforming and shearing
- » Handles 20-25 guage metal
- » Runs studs at over 500 fpm
- » Variable or equal punch spacing
- » Punches/ cuts to within 1/8"
- » Servo-Drive & Motor Technology
- » Rotary drive boosts speed, accuracy
- » Rigid frame maintains tight tolerances
- » Dual closed-loop Beck Automation Controller for easy setup/ enhanced performance
- » User-friendly programming
- » Standard punch tooling cuts maintenance costs
- » Clean, Reliable slug removal
- » Compact footprint simplifies retrofit installations

THE BRADBURY GROUP

WE BUILD MACHINES. WE SELL SOLUTIONS.
