

SAFETY MOMENT

PRECAUTION & PREVENTION

Delta is currently the predominant strain of the Covid-19 virus in the United States. The Delta variant is more contagious: it is highly contagious, more than 2x as contagious as previous variants. It is important that we utilize safe hygiene practices & minimize risk wherever possible.

PROPER HYGIENE

Clean workstations before and after use at the end of your workday

Wash/sanitize hands using office supplies provided

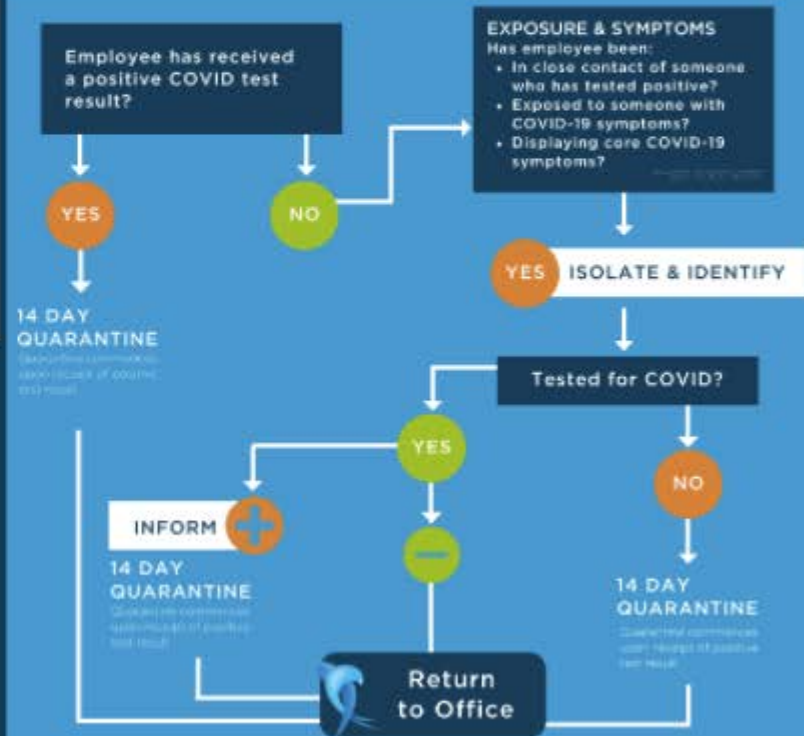

Use air-purifying fans during meetings in conference rooms

Isolate yourself & notify your supervisor if you begin to experience COVID-19 symptoms

COVID CASE FLOW

The CDC defines close contact as within 6 feet of an infected person for at least 15 minutes starting from 2 days before illness onset (or, for asymptomatic patients, 2 days prior to positive specimen collection) until the time the person is isolated.
