

Introducing the Hugo Lift

Easy, safe, efficient to use, Hugo lift replaces the need for ladders and steps.

Hugo is a lightweight push-around vertical mast lift, easy to transport, and with a compact design it's ideal for the most cramped working environments.

Hugo is excellent for many different tasks including stock picking; facilities maintenance; cleaning; visual merchandising; factory maintenance; data-centre maintenance.

HUGO

Key Features

Removable Storage Bins

Option to replace bins with a flat shelf

Height Adjustable Cargo Shelf

50kg capacity

Platform-Interlock Technology™

Automatically locks the gate when the platform is elevated

Simple Control Unit

- Highly manoeuvrable - ZERO inside turning radius
- Compact size and weight allows easy transportation, and Hugo will go through a standard single doorway
- Lightweight design means Hugo can go in most passenger lifts and on floors with restricted floor loading
- Easy to operate with simple controls for elevating

Manual release brake
Non Marking wheels & corner bumpers

- British design and manufactured
- Minimal operational, maintenance and service costs for years of trouble free service
- Auto-elevation braking ensures operators can't forget to apply brakes

HUGO

Quick Specs

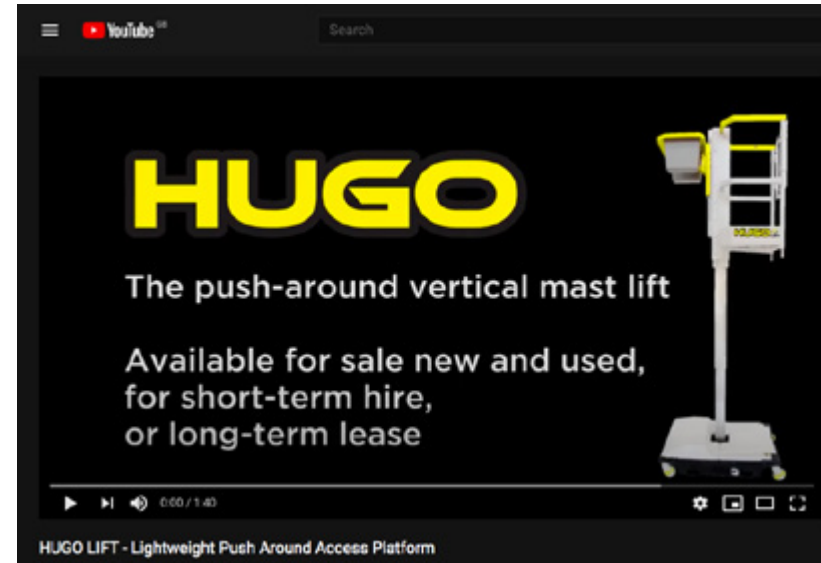

- Up to 4.2m working height
- Height adjustable cargo shelf minimises manual handling
- 0.73m wide x 1.17m long x 1.4m high (when stowed)
- Mains-rechargeable battery pack powers elevation functions, 110/220V self-seeking charger included as standard

From £47 per week, contract hire for incorporated business.

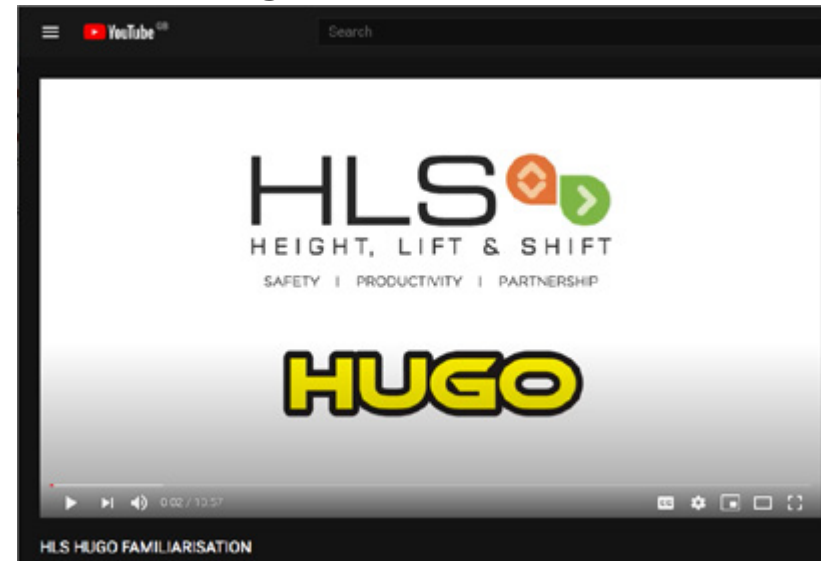

Other finance options available subject to credit approval.
