

HOW TO WEAR A

KN95 MASK

1

Clean your hands by washing them or applying hand sanitizer.

2

Determine which part of the mask is the top by finding the side that has a stiff edge to mold to the shape of your nose.

3

Put the mask on and cover your nose and mouth.

4

Pinch the nose piece to fit the shape of your nose.

5

Ensure a good seal by cupping your hands around the sides of the mask and breathing out. If you notice a leak, adjust the nose piece and tighten.
