

# Monetize Your Building Data Today

“buildee’s Building Relationship Manager (BRM) is a revolutionary platform in monetizing building energy data. In a fraction of time, buildee’s BRM has integrated our sales CRM, CMMS data, and utility data, for a high fidelity view and single source of truth of building performance.”

- Head of Energy Management - Large Public Portfolio Owner

## buildee® Building Relationship Manager Connect Data & Applications for 90% Faster Energy Decisions

Disparate data, products, and applications make energy related decision-making exceedingly difficult in buildings. buildee BRM solves that problem by bringing all data points and apps into a single platform, making building energy analysis more actionable.

### What does buildee BRM Do?

- Brings together teams, portfolios and programs into a single platform
- Scales utility programs
- Enables owners to make more strategic decisions through a high fidelity view across their portfolio
- Offers a single source of truth through transparent data and calculations from trusted industry sources
- Monetizes building data into strategic energy and cost saving projects

### What is buildee BRM used for?

- Utility program scaling - Increase applications, conversions, team productivity, and project throughput while strengthening customer engagement and relationships
- Portfolio capital planning
- Rapid identification, analysis, and prioritization of energy saving
- Unlocking hidden value in buildings
- Increasing building value through reduction of operating expenses

## Key Benefits

- 90% time savings over traditional processes when identifying and analyzing retrofit opportunities
- Centralize data & inform capital planning
- Connect stakeholders to drive projects
- Rapidly analyze the business case for energy efficient building upgrades
- Single source of truth
- Connect 3rd party data and apps for high fidelity project analysis
- Hub for assets, data, analysis, and reporting
