

SAVE TIME, MONEY, AND RESOURCES WITH CAPEXCONNECT POWER APP SOLUTION

Created especially for manufacturers and built for Microsoft Dynamics 365, our automated [CapExCONNECT](#) Power App makes it easy to track capital expenditure (CapEx) requests, compare requested amounts to budgeted amounts, and plan for anticipated expenses.

Capital expenditure decisions are high value, high risk, and high impact. Good decisions enable an organization's growth strategy and competitive differentiation. Poor investment decisions can have catastrophic impacts. Don't let an outdated, manual CapEx process hold your company back.

With CapExCONNECT, easily manage and control your costs by tracking requests in real-time on a departmental level, giving you immediate access to all requests in various stages of the approval process.

WHY SHOULD YOU CHOOSE CapExCONNECT?

Cloud-Based

- Built on the Microsoft Power Platform in the Microsoft Cloud
- Ready to plug into all Dynamics 365 capabilities and leverages the Finance workflow engine
- Quick and easy to deploy
- Integrates into your existing system

Industry Expertise

- Our industry experts help improve manufacturing business outcomes using world-class processes built on the Microsoft Cloud
- We're focused on how our services and solutions will best serve your people, process, performance, and technology, and how we can continue to innovate your business

Maximize Your Technology Investment

- Maximize and extend your current investment in Microsoft technology to solve other common business challenges, such as CapEx requests and approval processes
- Continue to optimize and innovate different areas of your business throughout your cloud journey

Finance departments can overcome their CapEx challenges and extend and repurpose their Microsoft technology investment by using MCA Connect's CapExCONNECT Power App. Let us help you continue to use the Microsoft solution stack properly and effectively. We care about your ongoing challenges and are confident that our tailored solution will bring continued optimization and innovation to your cloud journey.
