New: ScriptRunner Version 2020R2 with new user portal and Microsoft Azure integration

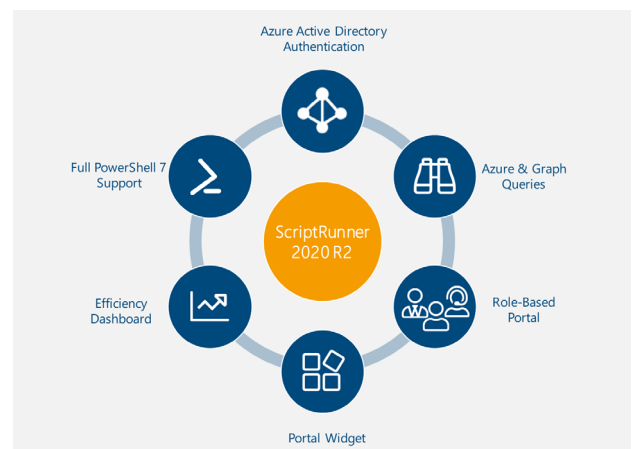

Ettlingen, 12. January 2021. ScriptRunner Software has up-dated its PowerShell management solution. Version 2020R2 includes important innovations in PowerShell management and offers a completely redesigned role-based user portal. In addition, ScriptRunner now integrates seamlessly with the Microsoft Azure cloud platform.

The new ScriptRunner version 2020R2 takes on a challenge from many companies: The comprehensive automation with PowerShell very often fails due to the complexity and associated training expenses. Thanks to the new ScriptRunner Portal, script execution is easier than ever. Users without prior PowerShell knowledge can start tasks such as on-/off-boarding employees through the newly developed web portal. The new dashboard clearly shows the efficiency gains that automation offers the company with ScriptRunner. With the help of the new Portal Widget ScriptRunner integrates into existing self-service websites, making it even easier for end users to use.

The new version takes the ongoing cloud trend in account, especially with Microsoft Azure. Authentication with Azure AD users is possible with the new version as well as directly integrated queries via Microsoft Graph, Azure Resource Graph, and Microsoft Data Explorer. This enables ScriptRunner Server to operate in Azure as well.

Another important innovation concerns the PowerShell 7 support. PowerShell 7 was recently released and extends automation capabilities to include Linux and MacOS systems. With version 2020R2, PowerShell 7 is now available not only for ScriptRunner Actions but also for queries and target connection tests. „We are convinced that with the new UI we have significantly improved the user experience for our customers. In addition, the complete integration with Azure and Microsoft 365 represents another milestone in our ScriptRunner Cloud Journey," says Frank Kresse, Head of Product, ScriptRunner Software.

The new version of the PowerShell management solution ScriptRunner is now available for download. In our free webinar we will show you all the new features and answer all your questions about the new version. We look forward to welcoming you at the next webinar on 28th January 2021 from 4:00 to 4:45 pm. Register now!
