

Warehouse Management Software **That Scales With Your Business While Helping it Grow**

With real-time data, you can make real-time decisions. Better data allows you to execute advanced fulfillment strategies like wave planning.

Is your warehouse optimized?

Can your warehouse handle more sales? Optimize your warehouse management with **LOGIWA** so your answer is always a resounding **YES!**

When we talk about warehouse management, we're talking about all of the processes and procedures related to moving inventory in and out of your warehouse and controlling that part of your business. Now think about all of the different sales and shipping channels that can touch your process at any given time. Customers may be able to place orders in multiple marketplaces. That alone makes it hard to keep inventory numbers accurate across all of your channels. **Not when you have LOGIWA though.**

How accurate are your inventory levels?

When our customers connect all of their sales channels to **LOGIWA**, accurate inventory numbers are pushed to all of the places your customers find your products. Enter in the correct numbers once, and **LOGIWA** does the rest for you.

You can get a bird's eye view of your inventory levels from our intuitive dashboard. You'll know what you have, and so will your customers. No more overselling due to bad numbers.

100%

INVENTORY ACCURACY
WITH LOGIWA WMS

Better Warehouse Performance = Higher Profit Margin

LOGIWA'S efficiency and simplicity stretch to all aspects of your warehouse. Your warehouse employees can carry **LOGIWA** around in the palm of their hand. **LOGIWA** syncs accurate data across your entire interface. So the inventory numbers you see on your dashboard are what your employees see on their devices too.

Better Data for Better Fulfillment

With real-time data, you can make real-time decisions. Better data allows you to execute advanced fulfillment strategies like wave planning and cross-docking. Pulling off strategies like these with outdated data are difficult to execute at best. They're a disaster at worst. **LOGIWA** keeps all the best data at your fingertips. You'll join the ranks of other **LOGIWA** customers who've seen their shipments increase 2.5 times since bringing **LOGIWA** into their operations.
