

# N-HEXANE

## 2 COMPONENT MIXTURES

N-HEXANE BALANCE AIR					
Concentration*	Cylinder Size	Volume (ft <sup>3</sup> )	CGA	Mixture Grades Available	Equipment Recommended
1 ppm – 5000 ppm L.E.L. 1.1%	DA QA GA K Q G		590	Primary Standard Certified Standard Uncertified	400 Series regulator
D.O.T. Proper Shipping Name: I.D. Number: Hazard Class: Shipping Labels:	Compressed gas, n.o.s., (Air, Hexane) UN1956 2.2 Nonflammable Gas				

N-HEXANE BALANCE HELIUM					
Concentration	Cylinder Size	Volume (ft <sup>3</sup> )	CGA	Mixture Grades Available	Equipment Recommended
1 ppm – 5000 ppm	DA QA GA K Q G	146 84 32 200 67 34	350	Primary Standard Certified Standard Uncertified	400 Series regulator
D.O.T. Proper Shipping Name: I.D. Number: Hazard Class: Shipping Labels:	Compressed gas, n.o.s., (Helium, Hexane) UN1956 2.2 Nonflammable Gas				

N-HEXANE BALANCE NITROGEN					
Concentration	Cylinder Size	Volume (ft <sup>3</sup> )	CGA	Mixture Grades Available	Equipment Recommended
1 ppm – 5000 ppm	DA QA GA K Q G	146 84 32 200 67 34	350	Primary Standard Certified Standard Uncertified	400 Series regulator
D.O.T. Proper Shipping Name: I.D. Number: Hazard Class: Shipping Labels:	Compressed gas, n.o.s., (Nitrogen, Hexane) UN1956 2.2 Nonflammable Gas				

\*Cylinder pressure and volume varies proportionately at higher concentrations.

A certification will be provided upon request for a nominal fee, except for uncertified mixtures.

TECHNICAL INFORMATION	
High Pressure Cylinder:	2000 psig @ 70° Fahrenheit

# N-HEXANE

## 2 COMPONENT MIXTURES

### BUILD MIXTURE PART NUMBER:

To build your part number, select the code that corresponds to each section. Start with the Balance Gas, next enter the Minor Component followed by the Minor Component Concentration. Then select the Mixture Grade and finally the Cylinder Size. Add a dash "-" before the size code to complete the part number. Let's create a part number. For example, take a Primary Standard grade of 5 ppm N-HEXANE balance NITROGEN in a size DA cylinder. From the table below we can follow the tables to come up with NI NH5MP-DA.

Balance Gas (A B)		Minor Comp Code (C D E)		Minor Component Concentration ([E] F G H I)		Mixture Grade (J)		Cylinder Size (K L)
Balance Gas	Code	Minor Gas	Code	Concentration	Code	Grade	Code	Code
Air	AI	N-Hexane	NH	5 PPM to 99 PPM	5M – 99M	Primary Standard	P	DA
Helium	HE			100 PPM to 999 PPM	100 – 999	Certified Standard	C	QA
Nitrogen	NI			1,000 PPM to 9,999 PPM	1000 – 9999	Uncertified	U	GA
				1% to 10%	1 – 10			K Q G
<b>Example Only:</b> NI		NH		5M		P		DA
