C-SERIES CUSTOM CYLINDER CABINETS

MODEL C-SERIES CUSTOM CYLINDER CABINETS

The C-Series Gas Cabinet Systems are designed to provide unparalleled protection to both the mounted gas supply system and their attached gas cylinders. Constructed with sturdy 11-gauge thick steel, the cabinets are built to meet international fire codes. Cabinets come pre-installed with a 165°F (74°C) sprinkler head near the exhaust vent. Cabinet doors and windows are made to close and latch automatically. The welded single body construction and rigid cylinder brackets increase sturdiness of the cabinet in the event of fires or earthquakes.

C-Series custom designed cabinets to suit any laboratory or analytical requirement. Possibilities include:

- Cabinets with separate pressure controls to deliver multiple gases of similar composition that can be stored in the same location.
- Cabinets for flammable gases that include emergency shut-off valves, gas detectors, and excess flow switches that can be integrated with a 585 Series emergency shut-off controller.
- Cabinets for reactive gases that support a variety of purging options.
