

NORCIMBUS NFUSE BUBBLER SYSTEM GAS DELIVERY SYSTEM

NORCIMBUS nFUSE BUBBLER SYSTEM

Norcimbus NFuse Bubbler System is designed for safe, automatic delivery of temperature-controlled chemical vapor, via a carrier gas. The N-Fuse Lite system is a complete unit assembly that includes the enclosure, process controller, process panel, and carrier vessel. The system is designed to deliver the carrier gas, process liquid, vapor, and purge gas all in a single unit assembly.
