

TC-3 MODEL CYLINDER CABINET

TC-3 MODEL CYLINDER CABINET FOR TOXIC & CORROSIVE GAS CYLINDERS (HOLDS 3 EACH UP TO 9 1/2" DIA. CYLINDERS)

Three cylinder gas cabinets are designed to enclose process gases in either a process/process/purge configuration with a dedicated outlet per process panel or set up for an auto crossover configuration. The three cylinder configuration allows for a standard or auto crossover, with a dedicated purge cylinder enclosed in the same unit, as your application may require.

- 8" x 3" top-mounted exhaust vent
- 1/4" thick, wire-reinforced window for visual inspection
- 165°F (74°C), top-mounted sprinkler head
- Removable back panel, mounted inside rear cabinet
- All welded construction, 11-gauge steel, epoxy painted
- Textured finish outside the cabinet, smooth finish inside
- Auto 6-valve process panel, plus PLC controller; or manual 6-valve panel with ESO plus Life Safety controller options available, based on hazardous gas category
- Startup training, function testing, and commissioning all included with each cabinet. (Travel may be quoted separately.)

Note: The use of a cylinder cabinet for certain gas delivery and distribution processes may be restricted based on local TGO requirements. All TGO requirements are the responsibility of the end user. Please consult your EH&S for specific requirements.

ORDER INFORMATION
