Node and Mongo Senior developer

Your Opportunity

This is an outstanding and exciting opportunity for an experienced and talented individual who will work on a MEAN stack with industry experts in one of the hottest technology sectors right now: Enterprise Applications.

About Applaud

We are a pioneering HR technology provider who has been serving Fortune 500 companies in all verticals, globally, for over 10 years.

Applaud is built on the belief that employees should have the same exceptional technology experiences inside the world of work, as they expect outside the world of work, as consumers.

We're all gadget-obsessed, but people always come first, technology second, because it's consumer expectations that set our technology standards.

About You

You have a strong passion for scripting and coding, have expertise in handling deployment automation, infrastructure automation, and the ability to handle version control.

Good at communicating and collaborating with others including different IT and Development teams.

Job description

- Take a lead role in modeling and developing the database schema and in architecting and building the nodejs application
- Design and develop multiple aspects of the application such as identity management, role-based access control, embedded analytics, payment collection

Applaud Solutions India Private Limited, #303, Manjeera Trinity Corporate Kukatpally, JNTU, Hyderabad, 500072, INDIA
Applaud Solutions India Private Limited is registered in India CIN U72900DL2015FTC279603

applaud

- Assist with creating a scalable, performant, and secure nodejs/mongodb infrastructure in Amazon EC2
- Work in an office with exceptionally bright individuals
- Work in an agile environment
- Liaise and communicate with Applaud's product owner and executive team

The Role

You'll join a team of over 50 talented people in our Hyderabad office, and enjoy a fun, rewarding and memorable employee experience. The role is permanent, full-time and reports into a manager-level position.

Skills Required

We are looking for a talented and experienced Node.js and mongodb senior developer with the following skills.

- 4+ years' experience as a JavaScript developer
- 4+ years' experience as a server-side developer
- Advanced knowledge of node.js and mongodb
- Experience with designing JSON-based RESTful APIs in node.js
- Preferred experience of operating nodejs/mongodb in a production environment
- Excellence in mongodb object and database modelling
- Ability to grasp domain knowledge and business requirements quickly and convert into a robust system design
- Good communication and team-playing skills

The following will be advantageous:

- Knowledge of Passport, oauth 2.0 and identify management
- Application security design (eg, roles-based access control)
- BI reporting, embedded analytics, big data and in-memory architectures
- Integrating with payment collection systems (eg, Worldpay/Paypal)
- Vuejs and the MEAN stack; full-stack developers welcome
- Graps of network and infrastructure design (DNS, subdomains, HTTPS)

The Benefits

Your fun, rewarding and memorable Applaud experience also comes with:

- Competitive pay
- Performance based bonus (in addition to your CTC package)
- A talented and experienced team as your colleagues
- Opportunities to learn and develop your career to the next stage
- An unrivaled work-life balance

How to Apply

Please email your resume to careers@applaudsolutions.com together with any covering notes.
