

Reflectiz Release Notes V4.3.1

Welcome to the Reflectiz product release update. We gather all the recent changes and updates of the product so you can benefit from our upgrades.

Here are the main things you should know:

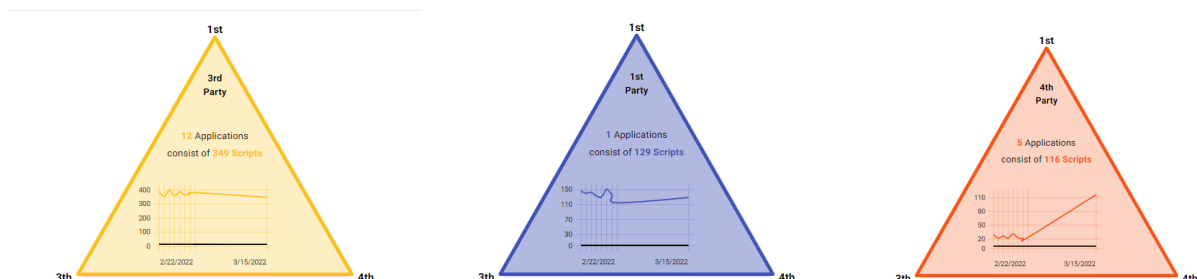

Active Monitored Technologies - allow better risk profile with 1st, 3rd and 4th parties and the total number of scripts!

- **1st Parties** - Scripts embedded directly on the site, servers and any owned domains you defined as 1st party.
- **3rd Parties** - Technologies which were installed directly - by the site itself.
- **4th Parties** - Technologies which were NOT installed directly by the site. Indirect technologies are those who were brought to the site by previously installed technologies.

The new categorization will help you to understand where your risks are coming from and how to impact the severity of your alerts. Our system automatically applies different rules for different parties.

While you click on each of the categories, you can also view the usage trend:

Application notes - we've added the option to add a note for any application in your inventory. Under the widget of all details you can now find tree tabs:

1. Description - App name and its description
2. Scripts - Updated UI for scripts connected to the app, you can also see the hash, and the total number of pages this script appears in.
3. **NEW!** Note - Add a personalized note (up to 280 words) for every application, for every note you can see the writer details and the publish time.
Notes will be cross-licensed, meaning that you will see the same notes on the same application across whole websites on the same license.

The screenshot shows the 'Note' tab of an application details page. At the top, there are three tabs: 'Description' (labeled 1), 'Scripts(226)' (labeled 2), and 'Note' (labeled 3). The 'Note' tab is active. It contains a large text area with a yellow border and a placeholder text: 'This needs to be addressed as soon as possible.' Below the text area, there is a metadata bar showing 'Modified: 3/17/2022' and 'By user: Admin Reflectiz'. An 'Update' button is located at the bottom right of the note area.

If you have any more questions or you would like to get more details about our new feature please contact the Reflectiz support team at support@reflectiz.com.

We are committed to expanding our capabilities to help you constantly elevate your digital security standards.

**Best regards,
The Reflectiz Team**
