

15 COGNITIVE ASSESSMENTS.

**1 REVOLUTIONARY SOLUTION.
ZERO WASTED HOURS ON
CYBERSECURITY HIRING.**

HAYSTACK SOLUTIONS

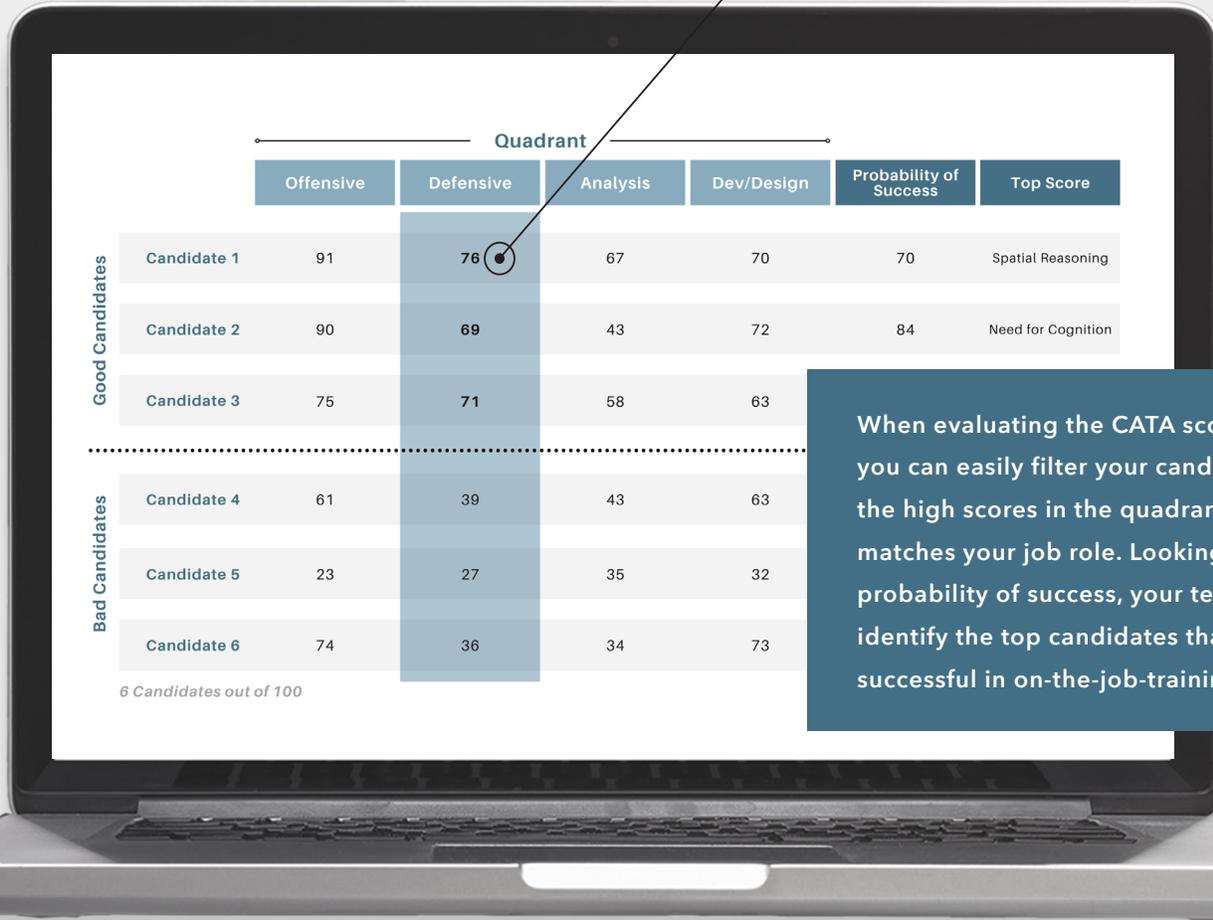

Today's cyber attackers won't stop and wait for you to hire the right cybersecurity expert. While you're spending countless hours sorting through hundreds of candidates with unclear credentials, your attackers are continuing to advance closer. The global cybersecurity industry has less than half of the professionals it needs to keep up with the growing demand to protect and defend our assets. In this environment, how do you find a needle in a haystack? How do you quickly and reliably find the right hire—the needle in a haystack?

The Cyber Aptitude and Talent Assessment (CATA).

**Learn more about CATA:
haystacksolutions.com**

SAMPLE REPORT: SECURITY OPERATIONS ROLE DEFENSIVE QUADRANT

Strong cognitive disposition for:
Network Security | Incident Handling
Security Operations Center

When evaluating the CATA score report, you can easily filter your candidates by the high scores in the quadrant that best matches your job role. Looking at the probability of success, your team can identify the top candidates that will be successful in on-the-job-training.

97%

CATA was 97% effective at predicting who was going to become elite Cyber Warfare Operators in the **U.S. Air Force**.

20%

At the **University of North Georgia**, CATA was used in developing a team that won the NSA Codebreaker Challenge in 2019 and 2020, while increasing the percentage of women on the team from 10% to 20%.
