# What's hiding behind those URLs? How can you tell?

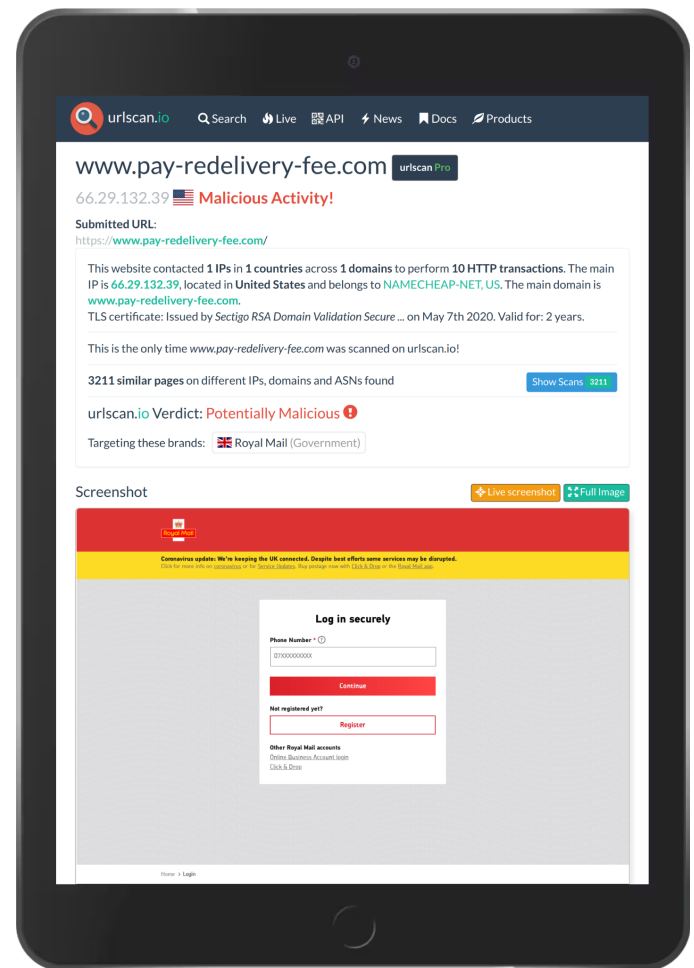

How long do you think it takes to set up a website imitating your corporate brand identity? Will your customers recognize a fake website? Will you?

urlscan will help you analyse suspicious and malicious websites at scale. Use the API with one of the many available SOAR tools to automate your security workflows. Our **urlscan Pro** platform will allow you to tap deep into our data and give you the context you need to discover related infrastructure and campaigns. urlscan tracks phishing and brand impersonation targeting more than 600 major brands and institutions.
