

Rapidly Innovate Your SAP ERP System

Pillir's EdgeReady Cloud provides rapid application development for SAP customers with little-to-no programming, reusable objects and zero middleware.

Quickly innovate and easily integrate to next generation cloud services.

Pillir's EdgeReady Cloud natively integrates with S/4HANA and ECC with no middleware to manage or maintain. The platform enables organizations to quickly migrate, build, and extend all SAP ERP custom applications, converting ABAP to cloud-ready applications. Applications are hosted on Pillir's self-managed, cloud-native infrastructure and users are provided with a streamlined, modern experience across any device and any connectivity landscape.

Develop amazing U/X that is tightly integrated to SAP digital core functions for Edge users.

With 100+ combined years of engineering and product development time, Pillir's EdgeReady Cloud was built to utilize cloud-native scalability, resiliency, and security. EdgeReady applications are hosted as SaaS applications with pre-built features and functions. Users can generate these apps with little-to-no programming or extend the EdgeReady Cloud with code as needed.

Pillir's EdgeReady Cloud provides pre-built, native adapters to many business systems and databases, as well as patented offline capabilities that enable data accuracy in any connectivity landscape. Offering users the ability to automatically test their environment on any device or network, Pillir's EdgeReady Cloud can take on the most complex use cases and help increase speed-to-market timelines with less resources than ever. Modernize any legacy app to a cloud-based SaaS application and convert any legacy code using Pillir's EdgeReady Cloud.
