TS-90 - 90° Angle Pattern TBOE

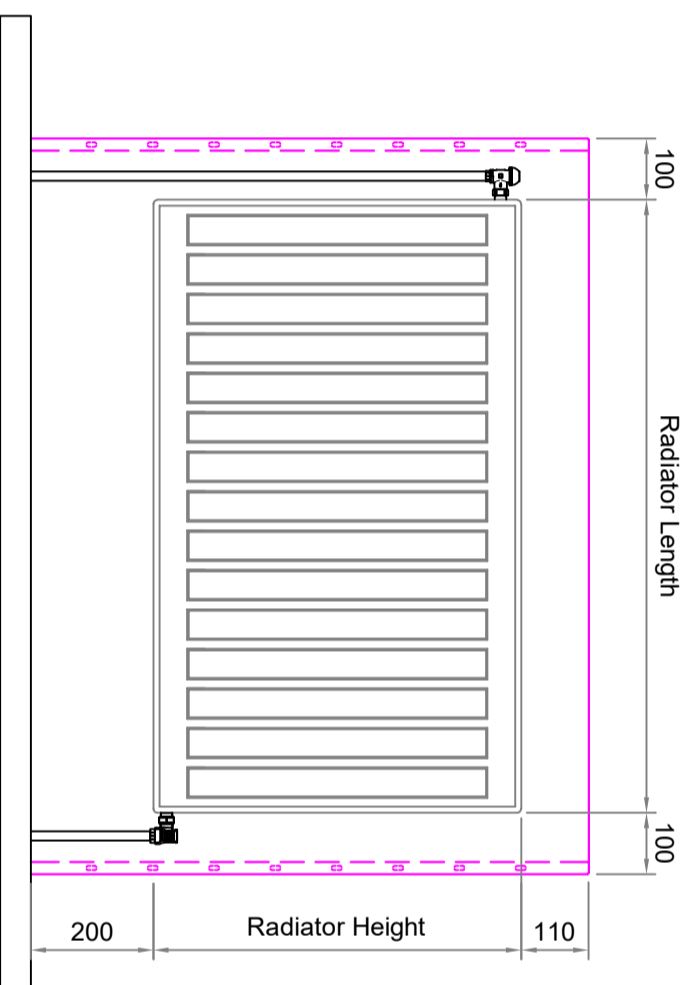

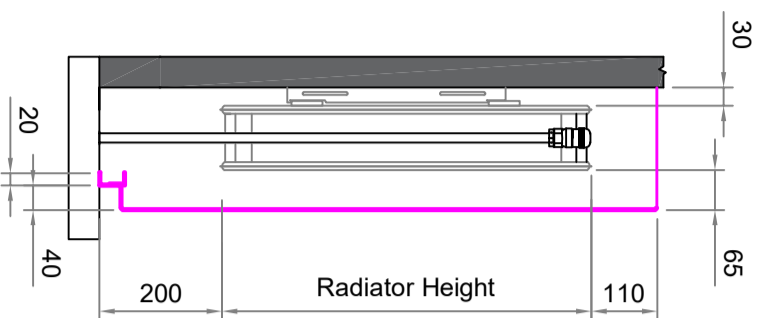

Emitter as standard should be fitted 200mm from the floor
Valve connections are TBOE - 90 degree pattern

Any drain off valves installed must be within the length and depth of the radiator

Internal TRV not recommended due to sensor being inside the cover at the top which may cause it to shut off early

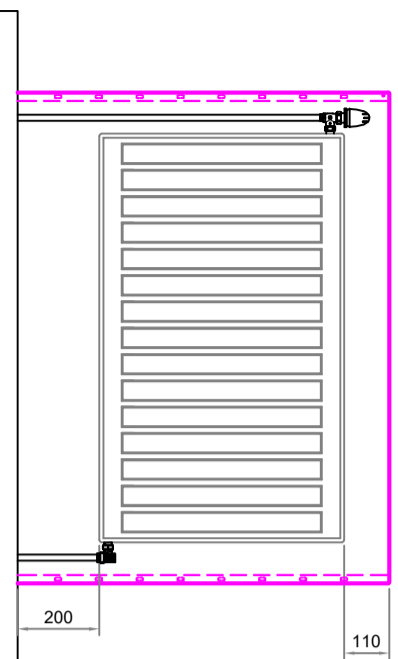

All valves are suitable for 1/2" steel pipes.
All kits come complete with a nut and olive to accept 15mm BSP copper.

* All dimensions in mm.
* Drawings not to scale.
