## TS-90 - 90° Angle Pattern TBOE

As standard we allow a 100mm tolerance from cover to underside of radiator. Please check if this enough tolerance and advise.

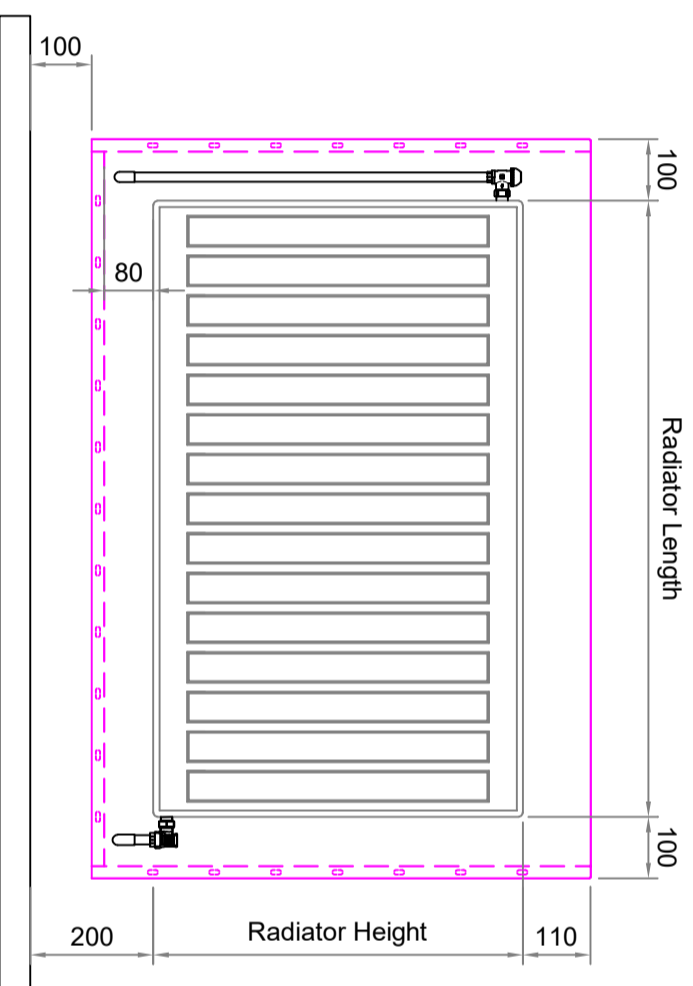

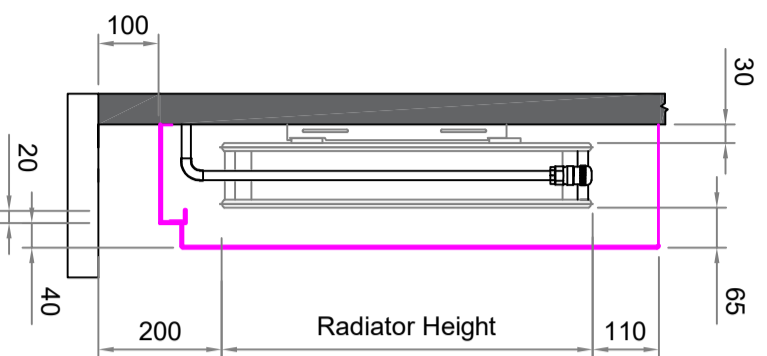

Any drain off valves installed must be within the length and depth of the radiator.

\*Cover preferred to be 100mm of the floor to allow for easy cleaning access.

All valves are suitable for 1/2" steel pipes. All kits come complete with a nut and olive to accept 15mm BSP copper.

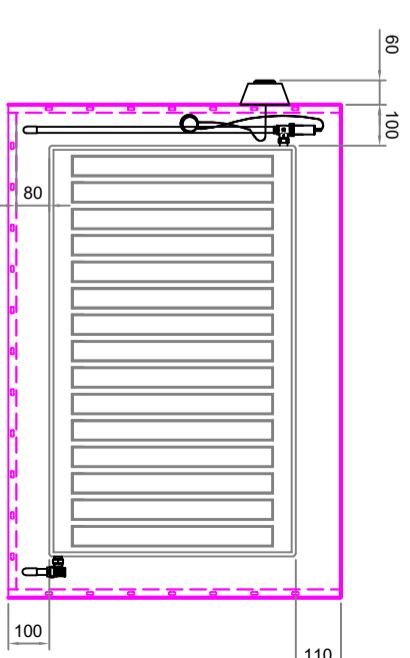

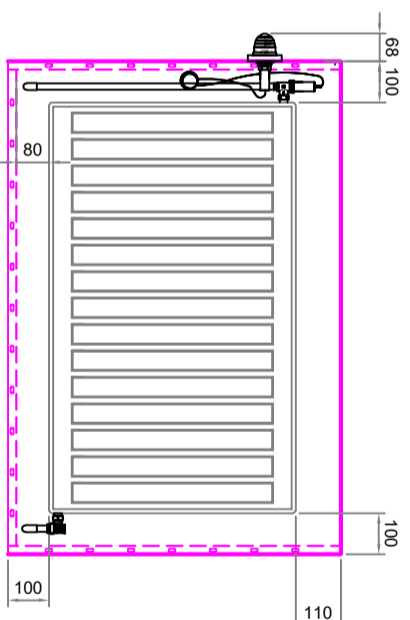

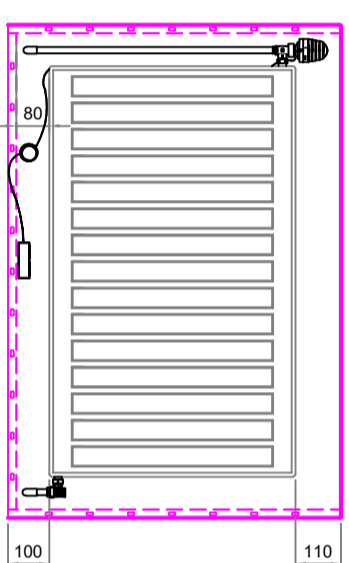

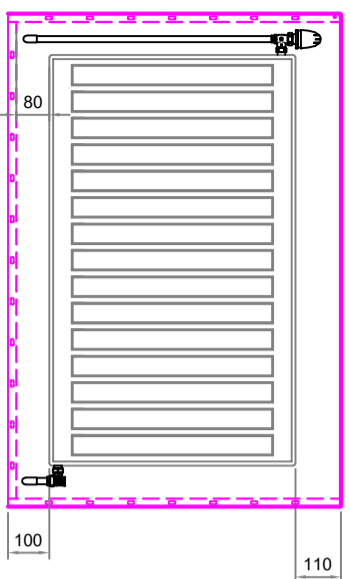

\*Internal TRV not recommended due to sensor being inside the cover at the top which may cause it to shut off early\*

\* All dimensions in mm.  
\* Drawings not to scale.

## Valve Options

### Not Recommended

Internal  
Code: 9210-13

Remote Sensing  
Code: 7463-41

External  
Code: 9330-41

Anti Ligature  
Code: 1935241
