

## Sexual Health Clinic In Worcester

### CASE STUDY

**SUMMARY:** The installation of 24 DeepClean LST radiators and the associated 9330 External TRV kits.

Before

After

As part of an investment to refurbish an existing building, many of the fixtures and fittings were outdated and posed a series of hygiene and safety risks to users operating within the space.

The installation of Contour's DeepClean LST radiators would provide users with efficient heating, as well as safe surface temperatures to minimise the risk of scalding upon contact. Additionally, the easy access front panel and BioCote protection would deliver a clean, hygienic solution.

## RESULTS

Due to there being different sized radiators along the wall space, Contour installed a wall-to-wall covering that gave the illusion of four convectors of the same size.

Contour recognise that each project will present its own unique challenges, and this Worcestershire Sexual Health Clinic was no exception.

Delivering a 'made to measure' result is where we truly thrive at Contour, as these results cannot be achieved via an 'off-the-shelf' solution.

For comprehensive information on Contour's LST radiator and guard range, or to arrange a free site survey, call 01952 290 498, or email [sales@contourheating.co.uk](mailto:sales@contourheating.co.uk)
