*Senior Full Stack Engineer (Front-end Focus) – Reston, VA*

**FrontStream** is looking for a **Senior Full Stack Engineer** with a focus on application front-end development to join our team in **Reston, VA**. This role will work closely with engineers, product managers, UX designers, and DevOps to build critical features for our solutions.  We are primarily using .NET in our technology stack, however, we are leveraging AWS and looking to use the right tools for the job. We have C#, Java, Ruby, Angular, SQL Server and Postgres applications in our suite of products.

*Company Overview:*
Trusted by 100,000 charities and socially responsible corporations across North America, FrontStream is revolutionizing fundraising through its all-in-one digital fundraising platform, Panorama. Our cloud based, SaaS platform enables charity organizations to successfully plan, manage and promote donation campaigns and fundraising events. We have been serving the non-profit sector for more than a decade, and we love what we do!

*Position Overview:*
This position is a key role with our engineering team and will report to the Director, Software Engineering. You will have the opportunity to work on modernization and technology transformation projects that have a direct impact on supporting non-profit organizations. The primary responsibilities for this role will be leading the front-end development effort for our team. We are constantly reviewing how we can improve the customer experience for both donors and non-profit organizers.

*What Can FrontStream Do For You:*
- Provide experience developing non-profit solutions that process billions of dollars annually for great causes.
- Provide experience taking legacy products and modernizing and optimizing in the cloud.
- Work with a highly collaborative, distributed team that learns from and supports each other.
- Know that your time, talent, and energy are supporting customers that are doing good in the world.

*How You Will Make An Impact For FrontStream:*
- Produce excellent code that performs well and is highly maintainable.
- Build and enhance features of our solution, including web, mobile and APIs.
- Participate in code reviews and offer constructive feedback to team members.
- Participate in architecture discussions and contribute architecture designs.
- Write and review automated integration and unit tests to support continuous delivery.
- Assist our DevOps team with code deployments, some of which are manual. Write scripts and/or TeamCity or Jenkins build configurations to remove manual steps.
- Help deploy and enforce security standards.
- Work within an Agile environment, as part of a scrum team.

***What You Will Bring To The Team:***
- A passion for learning and working with cloud technology.
- Experience with AngularJS, Angular, and Bootstrap or other JavaScript frameworks.
- Proficient in. NETCore, Entity Framework, C#, and REST APIs.
- Ability to apply strong knowledge of front-end technologies to create fantastic user experiences.
- Experience with SQL Server and PostgreSQL.
- Relentless problem-solving attitude and skills to figure out issues.
- Experience running systems in AWS or another cloud experience.
- Experience with JIRA or another ticketing system.
- Extra credit for AWS Certifications.
- Excellent written and verbal communication.

The company is headquartered in Reston, VA. However, remote work is available for this position.

Interested candidates should send their resume and references to: fs-recruiting@frontstream.com with "**Senior Full Stack Eng.**" in the subject line.  No phone calls please.

FrontStream is an equal opportunity employer.  The successful applicant will have proven eligibility to work in United States.
