Senior Quality Assurance Engineer– Reston, VA

FrontStream is looking for a **Senior Quality Assurance Engineer** to join our team in **Reston, VA**. This role will work closely with engineers, product managers, product designers, and DevOps to test critical features for our solutions.

Company Overview:
Trusted by 100,000 charities and socially responsible corporations across North America, FrontStream is revolutionizing fundraising through its all-in-one digital fundraising platform, Panorama. Our cloud based, SaaS platform enables charity organizations to successfully plan, manage and promote donation campaigns and fundraising events. We have been serving the non-profit sector for more than a decade, and we love what we do!

Position Overview:
This position is a key role with our engineering team. You will have the opportunity to work on modernization and technology transformation projects that have a direct impact on supporting non-profit organizations. The primary responsibilities for this role will be conducting manual tests and writing automated tests for our solutions.

What Can FrontStream Do For You:
- Provide experience testing non-profit and payment solutions that process billions of dollars annually for great causes.
- Work with a highly collaborative, distributed team that learns from and supports each other.
- Know that your time, talent, and energy are supporting customers that are doing good in the world.

How You Will Make An Impact For FrontStream:
- Perform manual and exploratory tests with the goal of automation.
- Extend and maintain our automated test framework.
- Build our load testing capabilities.
- Review unit tests to support continuous delivery.
- Be an advocate for building testable software.

What You Will Bring To The Team:
- A passion for learning and working with cloud technology.
- Experience with manual and API testing.
- Ability to switch between multiple products and conduct manual testing.
- Experience with testing automation frameworks (Rainforest is a plus).
- Proficient in writing test case documentation and other technical documentation.
- Relentless problem-solving attitude and skills to figure out issues.

- Experience running systems in AWS or another cloud experience.
- Any load testing experience (we use JMeter).
- Extra credit for AWS Certifications.
- Excellent written and verbal communication.

The company is headquartered in Reston, VA. However, remote work is available for this position.

Interested candidates should send their resume and references to: fs-recruiting@frontstream.com with "**Senior QA Eng.**" in the subject line. No phone calls please.

FrontStream is an equal opportunity employer. The successful applicant will have proven eligibility to work in United States.
