Where beautiful smiles begin

IvoSmile®

Consultation app
for visualizing esthetic
dental treatments

Making People Smile

Inspiring patients, increasing treatment acceptance

Use the IvoSmile® app during your consultation with your patients to show them how they would look with a new smile.

You can visualize esthetic treatment options on your iPad or iPhone in realistic renderings, using augmented reality technology.

Digital communication makes it easier and more convenient to communicate effectively with both your patients and laboratory partners.

Ideal consultation with patients

- ✓ Virtual mirror for your dialogue with your patients
- ✓ 3D visualization with live images
- ✓ Before/after comparison

Intuitive operation

- ✓ Easy-to-use user interface
- ✓ Straightforward photo import of patient images
- ✓ Areas of application: Tooth whitening, fixed prosthetics, removable prosthetics

Enhanced workflow

- ✓ CAD integration into the 3Shape Dental System (IvoSmile add-on)
- ✓ Simplified communication between practice and laboratory
- ✓ Clearly defined treatment goal – fewer misunderstandings and disagreements

30-day free trial

Enhanced patient motivation, easier treatment decision-making

Explain complex cases more effectively with the help of visualizations.

Show your patients their incredible new smile on the IvoSmile app in advance of a treatment.

Your benefits:

- ✓ Enhanced consultation quality
- ✓ Improved communication
- ✓ Reduced expenditure

Workflow

1 — Consult

Show your patients their incredible new smile on the IvoSmile® app and forward the visualization to your lab.

2 — Design

Create a design that matches the requirements of the individual patient using the 3Shape Dental System design software.

3 — Decide

Select from a variety of IPS e.max® materials for impressive esthetics and exceptional quality.
