

**TRITONWEAR**  
REDEFINING ATHLETE LIMITS

What meet managers need to know about  
**Triton 2 Meet Eligibility**

---

Gain a deeper understanding of what the Triton 2 unit can or can't do during a swimmer's a race.

## HOW IT WORKS

### Step 1

The Triton 2 unit tucks under the swimmer's cap and captures performance metrics based on the athlete's motion through the water.

### Step 3

The coach analyzes the athlete's race data to provide post-race feedback.

### Step 2

The device sends data to the coach's tablet on deck in real-time but **DOES NOT** communicate any information to the athlete as they race.

In reference to both:  
FINA's Swimming Rules section SW10.8  
USA Swimming's 2021 Rulebook section 102.8E

➤ TritonWear does not communicate any information to the swimmers during the race and thus **can't help with their speed, pace, buoyancy or endurance while they are racing.**
