

# Cyper TC

## Insecticide/Termiticide

Cyper TC is different from non-repellent termiticides. It provides a sturdy bond to the soil and will not move away from structures. This creates a barrier and prevents pests from crossing, controlling them on contact.

Cyper TC has a relatively low concentration of active ingredient. Combined with its long-lasting residual, this makes Cyper TC exceedingly cost effective and the ideal choice for destroying your toughest wood invading pests.

### Features & Benefits

- Cyper TC has low water solubility helping to prevent the product from filtering into water supplies.
- Cyper TC has a great long-lasting residual, performing at 90-100% even after years in the soil.

### Active Ingredients

Cypermethrin 25.4%

### Use Sites

pre- and post-construction, basements, crawl spaces, hollow masonry voids of foundations and porches

### Effective Against

cockroaches, scorpions, spiders, wasps, fleas, fire ants, termites

### Packaging

4 x 1 gallon (48 cases/pallet)  
30 Gallon (5-30 gal/pallet)
