

Fipronil 0.1G

Turf & Landscape Insecticide

A single, slit-applied application delivers sure-fire mole cricket control for six months and more. A broadcast application provides control of mole crickets for as long as four months and fire ants for up to one year.

Formulation

Granular insecticide

Effective Against

Slit application controls: Mole crickets

Broadcast application controls: Imported fire ants, Fleas, Ticks, Nuisance ants

Packaging

50 lb bag (40 bags/pallet)

Mode of Action

Contact or ingestion; blocks GABA-gated chloride channels in central nervous system

Signal Word

Caution - **RESTRICTED USE PESTICIDE**

Features & Benefits

- Can be slit- or broadcast applied at extremely low use rates for highly effective control
- Low use formulation, 0.1% Fipronil, kills mole crickets and fire ants on contact and provides dependable, long-lasting residual
- Works by contact and ingestion in all weather conditions
