

Foursome® Plus

Turf Pigment

Foursome Plus is a stable pigment designed to improve the Turf Aesthetic value which can be used as visual spray pattern indicator for applicators. It can assist with making spray applications of turf chemicals, foliar fertilizers, plant growth regulators, herbicides, insecticides and plant protectants with more consistent and uniform spray applications.

Foursome® Plus can be used to improve heat tolerance by reducing the stress on the plant and increasing the strength and plant durability.

When applied in late winter/early spring can improve the consistency of spring green up and Turfgrass transition.

Use Sites

Turf, golf courses

Packaging

4 x 1 gallon (36 cases/pallet)
