

Mosquito Mist Ultra

A Synergized Permethrin Formula

Mosquito Mist Ultra is a powerful misting concentrate that can be applied by ground or aerial equipment with versatile application methods. MMU uses a mix of Permethrin and PBO to provide a quick knockdown of many common pests, such as mosquitoes and flies, but also a long lasting residual to kill pests on contact even after application.

Formulation

Permethrin 20.6%

Piperonyl Butoxide 20.6%

Application Sites

animal quarters, roadsides, urban areas, residential areas, commercial areas, industrial areas, golf courses, parks, recreational areas

Effective Against

mosquitoes, biting flies, biting midges

Packaging

6 x 1 Quart (128 cases/pallet)

4 x 1 gallon (48 cases/pallet)

- Mosquito Mist Ultra is for use in automatic misting systems, barrier sprays, ULV, thermal and aerial applications
- One quart makes up to 55 gallons of finished solution with a dilution ratio of 1:219 (32 ounces/55 gallons)
- Flexible formulation can be diluted with oil or water
