Caution

Packaging

6 x 16 fl oz (150 cases/pallet)

Tekko Pro Benefits

Combination Chemistry
Provides effective, long-term control of listed pests including cockroaches, fleas, ants and many more.

Disrupts the life cycle of listed insects, preventing them from developing into adults.

Mode of Action

- Pyriproxyfen is a Juvenile Hormone Analog. Prevents normal adulthood development & causes sterilization.
- Novaluron is a Chitin Synthesis Inhibitor. Prevents the formation of a new exoskeleton.

Other takeaways

- Inhibits re-infestation by listed cockroaches for up to 6 months and fleas for up to seven months.
- Reduces egg production in houseflies and prevents development of larvae into adults.
- Photostable for up to 14 days
