The Next Generation of Termite Control

Control Solutions, Inc. is proud to introduce Taurus® Dry, featuring the Precision Delivery System (PDS). This new product combination brings the professional market a brand new option for managing termites! Taurus Dry was developed so pest management professionals (PMPs) have a simple, easy to use, precise, and effective method to control termites. This combination makes application of termiticide in hard to reach areas or against tough to manage termite species easier than ever before. "This is not your father's termite treatment!"

Dry Flowable Formulation

The formulation consists of a proprietary, non-repellent material, and the active ingredient **fipronil**. The end use product is delivered as very small particles – this allows application via the PDS and penetration into voids, galleries, shelter tubes and nests. *Wherever air can flow, Taurus Dry can flow.*

Application Information

4

APPLICATION SITES

- Where activity is present or suspected
- Structural or landscape timbers
- Voids
- Galleries
- Shelter tubes
- Termite nests
- Inaccessible areas of buildings
- Trees*
- Utility poles
- Fencing
- Decking materials
- Railroad trestles
- Piers*
- Beams
- Where termite damage is observed

*California - NOT for trees or piers.

APPLICATION RATES

To make applications with Taurus Dry and the PDS, access voids, galleries or shelter tubes and actuate the PDS for the appropriate amount of time. The PDS dispenses 0.05g of Taurus Dry per second of trigger actuation time. Injections should be made approximately every 24 inches. Please refer to the product label for more specific information on application rates and sites.

Killing Untreated Termites

Studies demonstrate that Taurus Dry is capable of topical or physical transfer among nest-mates, meaning untreated termites can be affected by interacting with treated ones. This sharing of Taurus Dry material and active ingredient means the product will spread throughout the colony, killing more than just the termites that were treated at the time of application. Taurus Dry typically takes about 2-3 days to begin to see results. It can be reapplied if termites are still active after 30 days.

7 Restrictions & Best Management Practices

PPE is required:

- Long sleeve shirt
- Long pants
- Sock & shoes
- Waterproof gloves

Label instructions:

- Read
- Understand
- Follow all

Keep the Taurus Dry PDS designated for only Taurus Dry.

DO NOT use Taurus Dry for general pest control.

- Taurus Dry is intended for use to manage termites. DO NOT use Taurus Dry for general pest management.
- DO NOT apply more than 5 g (25 mg of fipronil) per 1,000 ft² of total internal surface area of the void, carton or gallery.
- Be sure to properly store any unused product and your PDS in a secure location.
- DO NOT expose Taurus Dry to extremes in temperature or humidity.
- DO NOT turn the PDS upside-down during use.
- DO NOT apply other dusts or dry flowable products not approved for use in the PDS.
- Remove the cartridge and replace the cap when the PDS is not in use.

8

Why Taurus Dry Is A Must Have

Taurus Dry is a dry flowable formulation designed to be applied via the PDS for the control of all species of termites in nearly any type of situation and in any type of structural wood. The flexibility in applications make it a “must have” for termite control technicians. The PDS makes applications into carton material/nests, shelter (mud) tubes, voids, galleries, or any other wood from soil line to roofline easy! Taurus Dry can help address the most challenging termite problems quickly, effectively, and precisely with the simple pull of a trigger.

Testimonials

"With this industry, image is a big thing, if you come in with a professional image, your customer feels much more confident, in my opinion, on your ability to conduct a professional service."

-J. Santos Portugal III, Ph.D.
ABC Home & Commercial Services, Austin, TX

"I love the functionality of using the PDS to do one-handed treatments. I hold the PDS in one-hand and hold onto the ladder with the other hand."

-Anthony Leo, Owner
A-Leo Termite and Pest Control, Avondale, AZ

"Where Taurus Dry shines is its ability to quickly and effectively eliminate termites in problem areas that are not easily treatable or accessible by other treatment methods."

- Ed Assidio, Owner
North Jersey Termite, Inc., Pompton Lakes, NJ
