

Advisory Board Member Introduction: Nassim Hamein

Physicist working on Unification Theory, CEO of Torus Tech LLC and ARK Crystal LLC, Founder & Chairman at the Resonance Science Foundation

In February 2020, [Nassim Hamein](#) (World leader in Unified Physics, CEO-Founder of Torus Tech and ARK Crystal, and Founder of Resonance Science Foundation) and Bitstocks' CEO-Founder, Michael Hudson announced a partnership between their organisations.

Bitstocks and Torus Tech will be setting up a collaborative lab with PHDs selected and endorsed by Nassim Hamein. The project will focus on developing and understanding the geometric nature of the Mathematics within Bitcoin and its biological nature, to ultimately develop an intelligence system that can serve as what technology should be... an extension of the human experience.

As a company with a vested interest in developing Bitcoin mining centres, Nassim's scientific research and development in the field of sustainable energy production is invaluable. Nassim is also working towards unlocking an abundant energy source directly from quantum vacuum fluctuations, commonly referred to as overunity technology that will transform humanity and civilisation. Once unlocked, issues like climate change and global warming will fade away, scarcity wars may disappear, and space travel will be accessible to all.

Bitstocks is delighted to welcome Nassim to our Advisory Board, and look forward to pioneering sustainable Bitcoin mining going forwards.
