Cartegraph + zapier

CARTEGRAPH FOR ZAPIER

A NO-CODE SOLUTION TO AUTOMATE WORKFLOWS AND CONNECT YOUR APPS

WORK SMARTER

Eliminate manual, repetitive tasks—and save tons of time—by creating streamlined workflows for your team: send tasks to a Google calendar, update Excel data based on Cartegraph record edits, send a tweet when a pothole closes, or reschedule tasks based on a weather forecast. With Cartegraph for Zapier, you can build your own workflows in minutes and integrate with over 3,000+ popular apps, no developer skills required.

Create your own workflow

Select an app... → select a trigger.

+

Select an app... → select an action!

HOW IT WORKS

Set up two-way integrations with 3,000+ apps, including Microsoft Office 365 and Google Workspace solutions.

Create automated workflows—or zaps—built on trigger events in Cartegraph and other apps.

SOME IDEAS TO GET YOU STARTED

Send Cartegraph tasks to an Outlook calendar

Create non-asset tasks from ArcGIS Survey123

Reschedule tasks based on a weather forecast

Send a tweet when a pothole request closes

Send a text when a task is assigned
