

## Safety first!

All anchoring connections and components are NS9415 certified (Norwegian Standard 9415).

# MOORING

Safe, strong and well proven mooring solutions.

AKVA group offer an innovative mooring connector system that simplifies the mooring process and improves the structural strength of the pen when moored at the site.

We have an experienced crew and certified mooring solutions for any pen installation, ensuring the safety of your operations. A typical mooring grid with anchors, buoys and barges also allows for custom positioning to the farm site.

Fibre ropes, wires, chains, webbing, round slings, hooks, shackles, mooring ropes and hardware; we choose exclusively the best materials available in the market.

AKVA group can supply equipment according to specific needs. Please contact our sales department for more information and prices.
