

EMBEDDED ANALYTICS FOR HEALTHCARE SOLUTIONS

The future of healthcare is driven by digital transformation. From payers to providers, organizations are turning to modern healthcare solutions to automate processes, improve efficiency, and make better decisions.

But healthcare data is the largest and most complex of any industry, posing unique challenges and requirements for healthcare software companies. And now, more than ever, organizations need to focus on how they can more rapidly, cost-effectively, and securely enable their customers to leverage this vital information into reports and dashboards.

WHY IZENDA FOR HEALTHCARE SYSTEMS

Achieve better outcomes with Izenda's healthcare analytics platform. Our embedded solution provides security and accuracy across the financial, clinical, and operational side of your healthcare business.

Integrated Security For Sensitive Healthcare Data.

Izenda inherits your healthcare platform's security model to maintain HIPAA-compliance and any other privacy or data security requirements.

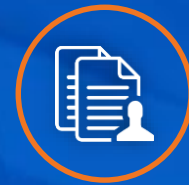

Designed to inherit existing authentication processes and security models through a combination of a token, and an API syncing process, Izenda is the most secure BI for healthcare.

Choose A Deployment That Best Fits Your Use Case.

From a standalone portal to a fully integrated solution, Izenda can be deployed in on-prem, cloud, and hybrid environments.

For instance, healthcare systems can easily deploy Izenda offline and on-premise for maximum security – and our no-code Admin UI makes user roles and permissions easy to configure.

Bring Together Disparate Data Sources For Better Decision-making.

Combine financial, operational, and clinical data to increase RCM productivity, improve scheduling and capacity planning, embed value across the care continuum, and more.

Izenda easily connects to your data sources through direct connection strings or REST API.

Izenda has been embedded in over 2,000 applications in nearly every industry vertical with a substantial presence in healthcare.

WHAT OUR CUSTOMERS ARE SAYING

We chose Izenda over a number of competitors because of its ease of implementation, fast time-to-market and lower total cost of ownership.

Brian McGraw
CEO, Intersect Healthcare

Izenda's licensing and technology model aligns perfectly with ours.

Grant Gaudette
COO/CTO, Essette

One of the key things we were seeking to offer our clients was automated delivery of their key reports....Izenda gave us this option, without us having to reinvent the wheel.

Director of Data Operations and Management,
EHR Solution

EXPERIENCED LEADERSHIP

In addition to our entire staff being HIPAA-certified, our experienced leadership team offers our clients a unique understanding and expertise of healthcare needs and requirements.

CHRIS CARTER

CEO & Chief Compliance Officer

With past affiliations with Emory Healthcare, Accenture, Sharecare, and ChartRequest, Chris brings over 15 years of operational, advisory, and principal investment experience with healthcare and technology companies to Izenda.

JAIMI PANINI

VP of Product

Jaimi is an empathetic and analytical product management professional with over 10 years of experience spanning agency, startup and corporate enterprise including healthcare companies Sharecare and Anthem.

ERIC GRONE

Sales Manager

Coming from healthcare solutions Waystar and athenahealth, Eric brings nearly 8 years of experience working with a wide swath of clients ranging from independent medical groups as well as large regional multi-site hospital and health systems in a sales and consulting capacity.
