

ATD Sensor

ATD: Acoustic Threat Detection

When a gunshot is heard, our cutting edge technology identifies the location of the threat.

How ATD Works

DETECT AND LOCATE THREATS IMMEDIATELY

Monitor activity and receive rapid alerts to real-time tracking information through your existing access control system. There are no limitations to the number of sensors you can install to ensure no threats go undetected. With a camera attached to every sensor, you'll never respond to a threatening situation blindly. Our agile surveillance cameras have a wide range of motion so that you never lose sight of a threat.

Mobile Surveillance Towers with ATD Sensor

Solar Powered Lighting & Surveillance

Designed for tough conditions and durability. Mobile Surveillance Towers offer robust lighting and the ability to power a camera configuration along with the ATD sensor.

No External Power Required

Whether you are monitoring city streets, campuses, or remote locations, ATD Portable was built to be deployed in a moment's notice for travel to and implementation at any outdoor communal space.
